

***Interactive comment on “Estimation of the advection effects induced by surface heterogeneities in the surface energy budget” by L. Cuxart et al.***

**Anonymous Referee #2**

Received and published: 1 March 2016

The investigation of the energy budget closure of the micrometeorological measurements and quantifying the effects of scale dependent advection are important from theoretical and practical points of view. The well written manuscript after the minor correction is suitable for publication.
