Atmospheric Chemistry and Physics Discussions

Interactive comment on "Overview of the European framework for online integrated air quality and meteorology modelling (EuMetChem)" *by* Alexander Baklanov

S. R. Freitas (Editor)

saulo.r.freitas@nasa.gov

Received and published: 5 January 2017

Dear Alexander, I was aware of your suggestions for the category of the present manuscript. Even that I assumed a review process would be necessary. As this is not the case, I am asking you to withdraw it and resubmit again. Therefore it can be managed following the rules of a non-per-reviewed preface. Saulo Freitas
