Received and published: 25 August 2016

The co-authors and I would like to thank both anonymous referees for providing constructive reviews. They helped us to improve and clarify the paper. We have responded fully to both reviews in the attached supplement, and we would be delighted to submit a revised manuscript.

In our response the original referee comments are written in italics in gray, our response in normal font, and changes made to the manuscript in normal font in blue.

Kay Steinkamp
