Detail Comments:

1. There are several abbreviations in the main text still do not have full name e.g. NF, NW, SE, SW (Line 259-260), MILARGO (Line 263).

Reply: These abbreviations that correspond to northeast, northwest, southeast and southwest, respective, have now been included as words in the revised text. The acronym MILAGRO stands for Megacity Initiative: Local And Global Research Observations, and has now been included in the revised text.

2. Figure 1. I suggest the authors include Mexico map in insert and show which part

of Mexico represent the study location (sampling stations).

Reply: The revised version has a map of Mexico, showing the location of Mexico City.
