General Comment

I found that the authors have improved their manuscript based on my comment and suggestion before.

Detail Comment

1. There are several abbreviations in the main text still do not have full name e.g. NF, NW, SE, SW (LIne 259-260), MILARGO (Line 263).

2. Figure 1. I suggest the authors include Mexico map in insert and show which part of Mexico represent the study location (sampling stations).
