Table S1 Summary of the major assumptions of the energy scenario.

	2010	2013
GDP (2005 price)/billion CHY <sup>a</sup>	31165	39486
Population/billion	1.34	1.36
Urbanization rate/%	49.7	53.7
Power generation/TWh	4205	5398
Share of coal-fired power generation/%	75.3	66.4
Crude steel yield/Mt	627	779
Cement yield/Mt	1880	2417
Urban residential building area per capita/m <sup>2</sup>	23	23
Rural residential building area per capita/m <sup>2</sup>	34.1	37
Vehicle population per 1000 persons	58.2	93.6
Share of new and renewable energy/% <sup>b</sup>	7.5	8.3

a CHY, Chinese Yuan.

b Including hydro power, solar energy, wind energy, ocean energy, and nuclear energy; excluding biomass.

Table S2. Penetrations of major control technologies in power sector in China (%).

Energy technology	Control technology	2010	2013
Grate boilers	CYC (PM)	12	10
	WET (PM)	88	90
Pulverized coal combustion	WET (PM)	0	0
	ESP (PM)	93	85
	HED (PM)	7	15
	FGD (SO <sub>2</sub> )	88	93
	LNB (NO <sub>x</sub> )	75	38
	LNB+SNCR (NO <sub>x</sub> )	1	2
	LNB+SCR (NO <sub>x</sub> )	12	54

Fluidized bed combustion	WET (PM)	0	0
	ESP (PM)	100	85
	HED (PM)	0	15
	CFB-FGD (SO <sub>2</sub> )	53	53
	SNCR (NO <sub>x</sub> )	0	0
	SCR (NO <sub>x</sub> )	0	0
Natural gas power	LNB (NO <sub>x</sub> )	74	70
	LNB+SNCR (NO <sub>x</sub> )	1	0
	LNB+SCR (NO <sub>x</sub> )	5	15

Notes: CYC, cyclone dust collector; WET, wet scrubber; ESP, electrostatic precipitator; HED, high efficiency deduster; FGD, flue gas desulfurization; CFB-FGD, flue gas desulfurization for circulated fluidized bed; LNB, low NOX combustion technology; SCR, selective catalytic reduction; SNCR, selective non-catalytic reduction. The table gives the national average penetrations of major control technologies. However, the penetrations vary with provinces. The penetration of the “key region” is usually larger than that of other regions.

Table S3. Penetrations of major control technologies in industrial and domestic combustion sources in China (%).

Energy technology	Control technology	2010	2013
Industrial grate boilers	CYC (PM)	0	0
	WET (PM)	95	85
	ESP (PM)	0	10
	HED (PM)	5	5
	WET (SO <sub>2</sub> )	95	70
	FGD (SO <sub>2</sub> )	1	30
	LNB (NO <sub>x</sub> )	0	18
	LNB+SCR (NO <sub>x</sub> )	0	5
Domestic boilers	CYC (PM)	14	15
	WET (PM)	78	85
	DC (SO <sub>2</sub> )	0	5
Coal stoves	STV_ADV_C	0	0
Biomass stoves	STV_ADV_B	0	0
	STV_PELL	0	0

Notes: DC, application of (low-sulfur) derived coal; STV\_ADV\_C, replacement of advanced coal stove;  
 STV\_ADV\_B, replacement of advanced biomass stove (e.g. better combustion condition, catalytic stove);  
 STV\_PELL, biomass pellet stove.

Table S4. Penetrations of major control technologies for selected industrial process in China (%).

(1) SO<sub>2</sub>

Industrial process	Control technology	2010	2013
Sintering	FGD	10	30
	FGD for coal filling process	0	5
Coke oven	FGD for coke oven gas	0	5
	Combination of the technologies above	0	0
Glass production (float process)	FGD	0	8
Sulfuric acid production	Ammonia acid desulfurization method	0	10

(2) NO<sub>x</sub>

Industrial process	Control technology	2010	2013
Sintering	SCR	0	7
	SNCR	0	0
	LNB+SCR	0	0
Precalcined cement kiln	LNB+SNCR	0	1
	LNB	35	47
Glass production (float process)	OXFL	0	16
	SCR	0	8
Nitric acid (dual pressure process)	ABSP	12	16
	SCR	18	30
	ABSP+SCR	0	0
Nitric acid (other process)	ABSP	63	65
	SCR	32	33
	ABSP+SCR	0	5

Notes: ABSP, absorption method; OXFL, oxy-fuel combustion technology.

## (3) PM

Industrial process	Control technology	2010	2013
	CYC	0	0
Sintering (flue gas)	WET	5	0
	ESP	75	75
	HED	20	25
	WET	100	100
Blast furnace (flue gas)	ESP	100	100
	ESP	30	25
Basic oxygen furnace	HED	70	75
	WET	30	20
Electric arc furnace	ESP	50	50
	HED	20	30
	WET	100	100
Coke oven	HED	0	0
	WET	0	0
Precalcined cement kiln	ESP	40	35
	HED	60	65
	CYC	0	0
Glass production	WET	20	20
	ESP	75	75
	HED	5	5
	CYC	30	30
Brick production	WET	20	20
	ESP	20	20
	HED	0	0

## (4) NMVOC

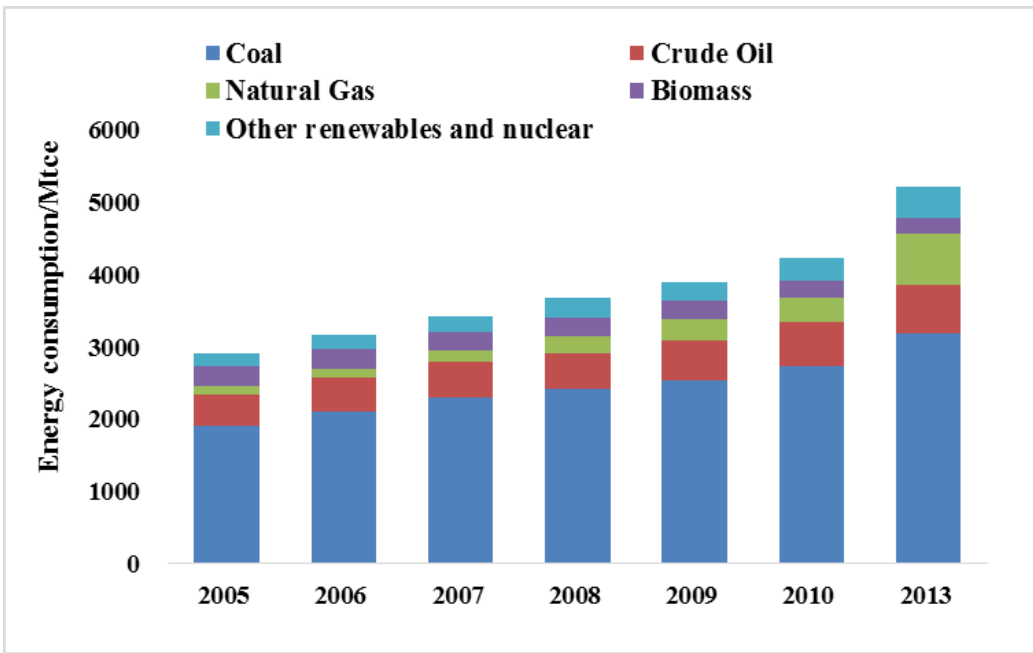

Industrial process	Control technology	2010	2013
Coke oven	No control	100	100
	End of pipe control measures	0	0
Refinery	No control	100	93
	Leak detection and repair program	0	5
	Covers on oil and water separators	0	2
	Combination of the above options	0	0
Plant oil extraction	No control	90	87
	Activated carbon adsorption	10	12

	Schumacher type DTDC and activated carbon adsorption	0	1
	Schumacher type DTDC and new recovery section	0	0
	No control	100	95
Pharmacy	Primary measures and low-level end-of-pipe measures	0	5
	Primary measures and high-level end-of-pipe measures	0	0
	No control	95	90
Gasoline storage	IFC (Internal floating covers or secondary seals)	5	10
	No control	85	80
Gasoline loading and unloading	Stage IA (Vapor recovery systems and modified loading techniques)	15	20
	No control	85	80
Service station	Stage IB + Stage II (Improvement in service station tank and vapor balancing system between a vehicle and service station tank)	15	20
Crude oil storage and distribution	No control	100	100
	IFC + Stage IA + Stage IB + Storage II	0	0

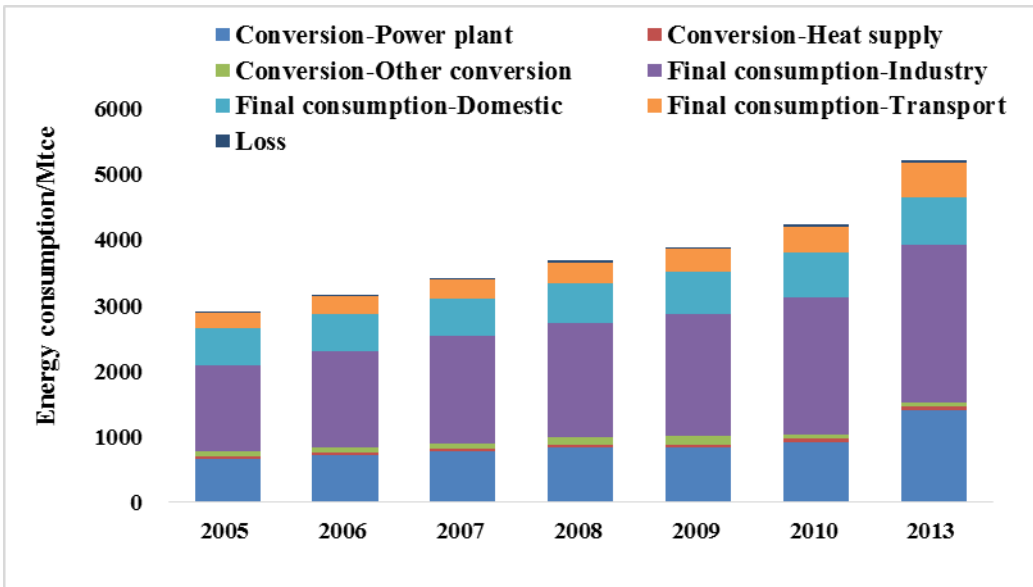

Table S5. Penetrations of major control technologies for NMVOC emissions from selected solvent use types in China (%).

Solvent use type	Control technology	2010	2013
	No control (GB18582-2001)	0	0
Paint use in interior wall of buildings	Decrease of solvent content--GB18582-2008	100	97
	Decrease of solvent content--2004/42/EC stage 1	0	3
	Decrease of solvent content--2004/42/EC stage 2	0	0
	No control (solvent-based paint)	78	75
Paint use in external wall of buildings	Substitution with water-based paint	22	25
	No control (water-based primer, solvent-based paint for other parts)	97	94
Paint use in vehicle manufacturing	Substitution with water-based paint	2	3

	Adsorption, incineration	1	3
	Substitution + adsorption, incineration	0	0
Paint use in vehicle refinishing	No control (solvent-based paint)	93	90
	Substitution with high solids or water-based paint	8	10
	No control (solvent-based paint)	89	84
	Incineration	0	1
Paint use in wood coating	Substitution with high solids paint	4	6
	Substitution with water-based or UV paint	7	9
	No control (solvent-based ink)	90	88
Offset printing	Substitution with water-based or UV ink	10	13
	Add-on control technology	0	0
	No control (solvent-based ink)	64	60
	Substitution with low solvent or water-based ink	35	38
Flexography and rotogravure printing (for packaging)	Add-on control technology	1	3
	Substitution + add-on control technology	0	0
	No control (solvent-based ink)	85	83
	Substitution with low solvent or water-based ink	15	18
Flexography and rotogravure printing (for publication)	Add-on control technology	0	0
	Substitution + add-on control technology	0	0
	No control (solvent-based ink)	85	83
	Substitution with low solvent or water-based ink	15	18
Screen printing	Add-on control technology	0	0
	Substitution + add-on control technology	0	0
	No control	98	95
	Add-on control technology	3	5
Adhesive use in wood processing	No control (solvent-based adhesive)	87	85
Adhesive use in manufacturing of shoes	Substitution with low solvent adhesive	13	15
	Add-on control technology	0	0

(a) Energy consumption by fuel

(b) Energy consumption by sector

Figure S1 Energy consumption in China from 2005-2013

Figure S2 Comparison of emissions for year 2010 and 2013 in China
