

Interactive comment on “Determination of the atmospheric lifetime and global warming potential of sulphur hexafluoride using a three-dimensional model” by Tamás Kovács et al.

Anonymous Referee #1

Received and published: 22 September 2016

See attached .pdf file of my comments.

The required major revision results mainly from the organization of the manuscript and from the lack of numerical justifications in the conclusions .

Please also note the supplement to this comment:
