

Interactive comment on “OMI air-quality monitoring over the Middle East” by Michael Barkley et al.

Anonymous Referee #1

Received and published: 6 December 2016

The authors of OMI air-quality monitoring over the Middle East have made a great effort to take on board most of my original comments, especially with regard to the length of the supplementary material. The presentation of their work has increased overall, which will lead to increased visibility to the community. I hence recommend publication after the remaining comments have been addressed to in reply-to-reviewer. Please see attached pdf.

Please also note the supplement to this comment:
