

20.March.2018

Dear Editor,

We are submitting to “ACP – PEEEX Special Issue” a reviewed paper entitled “Cryosphere: a realm of anomalies and diversity” written by the group of authors involved in the interdisciplinary program Pan-Eurasian Experiment (PEEX) but working in different areas: cryology (V. Melnikov, V. Gennadinik), biogeochemistry and physics of atmosphere-biosphere system (M. Kulmala, T. Petaja), global environmental observations and networks (H. Lappalainen), turbulence and heat/mass transfer in the atmosphere and ocean (S. Zilitinkevich), and dealing with very different aspects of cryosphere.

We have corrected the manuscript based on the 2 referee comments, which were rec-checking the figure references between text and provided figures. The reference for the “Figure 5” was deleted from the text. We have also corrected the name of the 2nd organization. The new name, starting from January 2018, is “Institute for Atmospheric and Earth System Research”.

Sincerely Yours,

Hanna K. Lappalainen
On behalf of all of the co-authors
