A comment on the lidar data.

The lidar data in Zamynnuud, Mongolia is taken from the AD-Net. We request to follow the data policy of AD-Net written in the AD-Net web page at <http://www-lidar.nies.go.jp/AD-Net/>. Nishizawa et al., 2016 in Reference is not suitable for the observations in Mongolia. Shimizu et al., Optical Engineering 56(3), 031219, 2016. doi:10.1117/1.OE.56.3.031219 would be fine. "LiDAR in the caption of Fig. 2 should be "Lidar." The term LiDAR is used only in the lidar mapping community.
