Author's respond to the Co-Editor

The concerns of the reviewers have been adequately addressed. While going through the revised version, I found a typo that needs to be corrected before the manuscript can be published.

Page 18, line 30 in the file Author's Response, the following sentence:
"The spatial extent of wind velocities above the threshold of 6ms−1 is greatest during the STRONG-FIRE (Fig. 9f), LARGE-FIRE:(Fig. 9h), ORTHO-FIRE (Fig. 9i) as well as in the STRONG-FIRE (Fig. 9d) setup."
should be:
"The spatial extent of wind velocities above the threshold of 6ms−1 is greatest during the STRONG-FIRE (Fig. 9f), LARGE-FIRE:(Fig. 9h), ORTHO-FIRE (Fig. 9i) as well as in the STRONG-WIND (Fig. 9d) setup."
(The second occurence of "STRONG-FIRE" should be "STRONG WIND".)

The authors would like to thank the Co-Editor for handling the manuscript and for the time he spent by carefully reading the manuscript. The found typo has been corrected now.
