Title: Sources of Submicrometre Particles Near a Major International Airport

Author(s): Mauro Masiol et al.

RESPONSE TO EDITOR

Co-Editor Decision: Reconsider after minor revisions (Editor review)

(27 Aug 2017) by Andreas Petzold

Comments to the Author:

Dear Roy Harrison

The manuscript requires two minor revisions before being accepted for ACP:

1. The abstract is overly long at >350 words. I suggest cutting this down to ~250.

RESPONSE: This has been reduced in length by 87 words.

2. Line 198: Define eBC.

RESPONSE: This is now defined by a reference.
