Received and published: 6 April 2017

Hoping that this helps reviewers interpret the arguments of Makarieva et al., and evaluate their validity, I attach a response file that was not published online for a prior submission of the article: <http://www.atmos-chem-phys-discuss.net/acp-2016-203/> The new response file may help in particular address some of the issues raised by Dr Remi Tailleux.

Tim Garrett
