Received and published: 10 May 2017

The following paragraph was mistakenly omitted in the production manuscript under the Acknowledgements heading:

The Dobson observations at Lauder are supported through NIWA’s core research funded by the NZ Ministry of Business, Innovation and Employment; at Perth by the Bureau of Meteorology, an Executive agency of the Australian Government; and at l’Observatoire du Haute Provence by the National Center for Scientific Research (CNRS), under the responsibility of the French Ministry of Education and Research.

C1

Support for the updating of the automation at several NDACC sites was provided by the NOAA Joint Polar Satellite System (JPSS) Calibration/Validation program.
