Dear Authors, I am happy seeing your discussion research paper in the ACP. However I wonder for the missing (proper) citation of the main text Figure 1 in the current manuscript (left panel climatic classification map, page 15) related to climate classification map of Nepal which was published in Theoretical and Applied Climatology Journal in 2015 (available via the link https://link.springer.com/article/10.1007/s00704-015-1549-0). with best regards Ramchandra Karki
