Page 9/16 should read "species" - *done*

There are also various references to tables A1 and A2 - these should be changed to tables 1 and 2 before submitting the production files. - *changed*

Otherwise, I am happy to accept the paper for publication.

I would like to thank the 4 referees who all provided very thorough reviews and made significant and valuable contributions to the paper. I'd also like to commend the authors for their decision to include additional modelling results (and co-authors), which have greatly improved the scientific quality and relevance of this piece of work.
