

Point by point response to editor's corrections

*Oh, those "concentrations"! Line 646 in the final version, delete "concentrations" after NH4+ (double up). Also Figure 4: delete the label for the y-axis (4a is in VMR, 4b-d in concentration); you give the labels in the text below the figure...*

*Other than that, accepted and on to publication! Truly a nice story, I liked it.*

*Jan Bottenheim*

[CW] Thank you for catching those, and for your work as co-editor! I have removed the y-label of Fig 4, and the second mention of the word “concentrations” in the text.
