Received and published: 15 March 2017

Figure 3b, 3d, 3f, and 3h did not include one set of coagulated particles that have activated (labeled “OC & BC & Inorg” in Fig. 3a). The attached figure corrects this, but only Fig. 3h changes notably. This change does not affect the analysis or reported findings, since it is consistent with the discussion in the manuscript. The caption of the Figure does not change.
