

Interactive comment on “Observational Analyses of Dramatic Developments of A Severe Air Pollution Event in the Beijing Area” by Ju Li et al.

Anonymous Referee #1

Received and published: 10 December 2017

Thanks for your responses.

I still hold on my comments. Our recent papers being submitted to Environmental Pollution all have four reviewers for each one. It is essential for publishing a high quality paper.

I recommend this paper should be sent to more reviewers for comments.
