

Supplementary Information

Table S1 Estimated range in total VOC concentration and total OH reactivity of each mixture injected into the reactor.

Mixture no.	total [VOC] / ppb	total OH reactivity / s ⁻¹
1	22-110	50-250
2	22-110	20-100
3	25-100	30-130

Table S2 O₃ + VOC literature data for compounds in the ambient air analysis.

compound	literature ^a $k_{O_3} / 10^{-17}$ $\text{cm}^3 \text{ molecule}^{-1} \text{ s}^{-1}$ 298 K
tridecane	$< 1 \times 10^{-6}$
isoprene	1.27
styrene	1.70
3-ethyltoluene	$< 1 \times 10^{-3}$
dodecane	$< 1 \times 10^{-6}$
1,2,3-trimethylbenzene	$< 1 \times 10^{-3}$
1,2,4-trimethylbenzene	$< 1 \times 10^{-3}$
naphthalene	0.02
2-ethyltoluene	$< 1 \times 10^{-3}$
<i>n</i> -decane	$< 1 \times 10^{-6}$
ethylbenzene	$< 1 \times 10^{-3}$
<i>n</i> -heptane	$< 1 \times 10^{-6}$
<i>n</i> -propylbenzene	$< 1 \times 10^{-3}$
toluene	$< 1 \times 10^{-3}$
benzene	$< 1 \times 10^{-3}$
isopropylbenzene	$< 1 \times 10^{-3}$
<i>n</i> -hexane	$< 1 \times 10^{-6}$
ethyl acetate	
dichloromethane
