

Interactive comment on “Multivariate analysis of Kelvin wave seasonal variability in ECMWF L91 analyses” by Marten Blaauw and Nedjeljka Žagar

Anonymous Referee #2

Received and published: 27 March 2018

On page C2 of my review it says "a function of g". I meant "a function of c", where c is the gravity wave speed. The meridional length scale is actually $\sqrt{c/\text{Beta}}$, where Beta is df/dy .

I am sorry for this error.
