

Referee Report for acp-2018-1065

“Precursors and formation of secondary organic aerosols from wildfires in the Euro-Mediterranean region” by Majdi et al.

The authors replied to reviewers' comments satisfactorily. The manuscript was revised according to the comments of referees.

I recommend the revised manuscript to be accepted as it is, with one technical suggestion:

Section 6 has subsections as 6.1 and 6.1.1. I think it would make more sense to replace 6.1.1 with 6.2.
