To Co-Editor Mathias Palm
Atmospheric Chemistry and Physics
Ref: Manuscript # ACP-2018-1253

Dear Dr. Mathias Palm,

We would like to thank you for your editorial assistance of our work entitled “*Large-scale Dynamics of Tropical Cyclone Formation Associated with ITCZ Breakdown*”, co-authored with Quan Wang and The-Anh Vu. In this revision, we have corrected some typos that you have helped point out and modified few discussions in Section 4 to avoid confusion about the PES conditions and the dynamical transition on the central manifold. Other than these few minor modifications, there is no other change in this final version.

Please let us know if you have any further inquiry or question. We thank you again and look forward to hearing the final editorial decision from you,

Respectfully,
Chanh Kieu, Ph.D.
