Received and published: 19 May 2018

The present manuscript is a revised version of Duan et al. (2017), which was submitted previously to ACPD. That manuscript was reviewed by one additional referee, which was not made public at the time. Responses to this second round of reviews are provided below. The posted manuscript here was revised to address the points raised by that referee in addition to the first two referres.

Duan, Y., Petters, M. D., and Barros, A. P.,2017. Understanding aerosol-cloud interactions in the development of orographic cumulus congestus during IPHEx, Atmos. Chem. Phys. Discuss., DoI:10.5194/acp-2017-396.
