

Comments to “*Light absorption of brown carbon in eastern China based on 3-year multi-wavelength aerosol optical property observations and an improved Absorption Ångström exponent segregation method*” by Wang et al,

General comments

The manuscript has been greatly improved. Now it is suitable for publication after minor revision:

1. Page 11 Line 5-6 (in the revised manuscript): please note the peak number of D_p in summer and autumn were not quite similar.
2. Page 12 Line 14-15 (in the revised manuscript): Please check “Fig. S2”. Here, it should be “Figure 4”.
3. Page 13 Line 6-7 (in the revised manuscript): Please check the values “from 0.6 to 1.9”, which are not consistent with those in the first panel of Figure 5a.
4. Please define the abbreviations (e.g., “DJF”, “MAM”, “JJA”, “SON”) in Table 1 and Figure S4. Or, use “winter”, “spring”, “summer” and “autumn” as used in other Figures.
5. Please use united expressions figures, e.g., “Figure” or “Fig.”
