

# ***Interactive comment on “Photochemical transformation of residential wood combustion emissions: dependence of organic aerosol composition on OH exposure” by Anni Hartikainen et al.***

**Anni Hartikainen et al.**

anni.hartikainen@uef.fi

Received and published: 10 March 2020

We thank the reviewer for these comments, which have been very useful especially considering the description of the aging conditions and the atmospheric relevance of the obtained results. We provide point-by-point responses to the referee comments and questions in the attached supplement. Changes done to the original manuscript during revision are visible in a supplement of an additional comment in the discussion thread.
