

Interactive comment on “Polar semi-volatile organic compounds in biomass burning emissions and their chemical transformations during aging in an oxidation flow reactor” by Deep Sengupta et al.

Anonymous Referee #2

Received and published: 18 February 2020

This paper could use a serious re-organizing for improved focus on what it actually contributes. Carrying over standard deviation across studies isn't sound science. It is recommended that the authors find a method for reporting error associated with these reported values. Please see attached comments.
