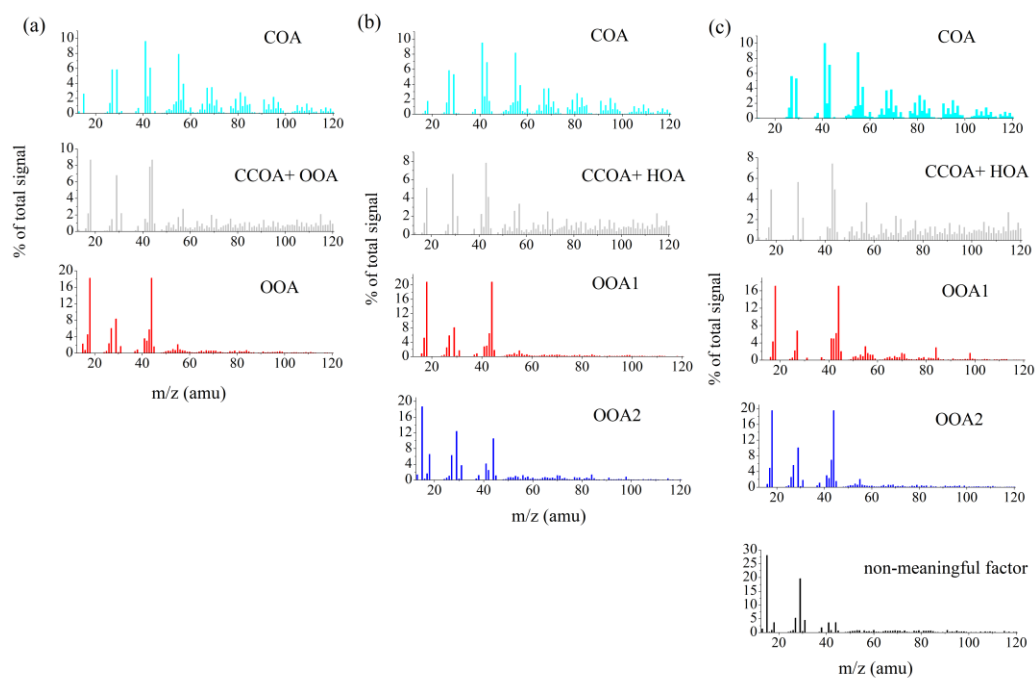

Figure S1. PMF profiles of OA sources for 4, 5 and 6 factor solutions.

Figure S2. ME-2 profiles of OA sources. The HOA profile is from that of Ng et al. (2011b), and the COA profile is from 4-factor PMF result. The others are unconstrained factors.

Figure S3. Mass fraction of PM₁ species and OA factors in later summer (a), autumn (b) and early winter (c).

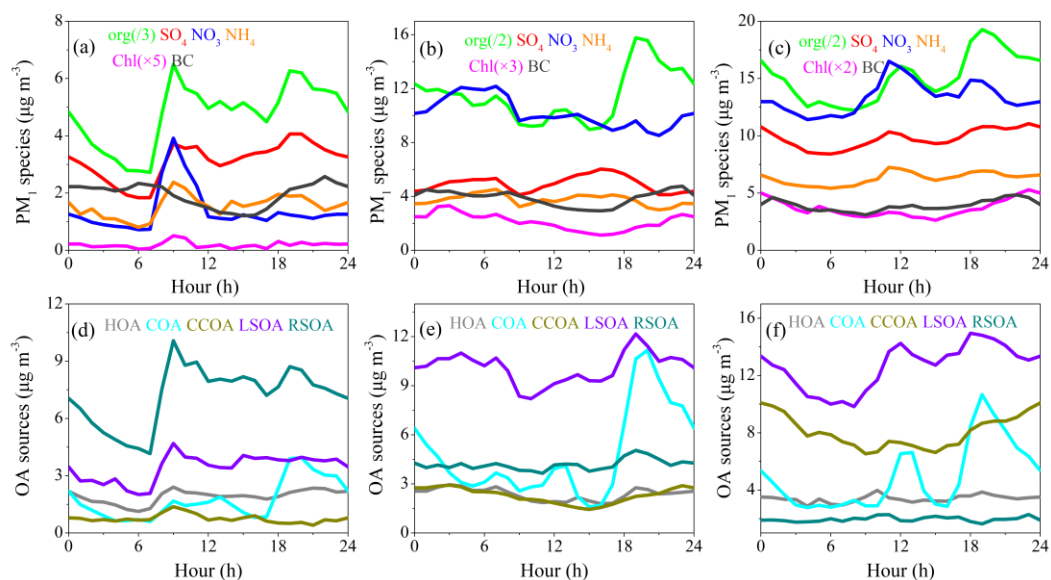

Figure S4. Diurnal cycles of PM₁ species and OA factors during late summer (a, d), autumn (b, e) and early winter (c, f).

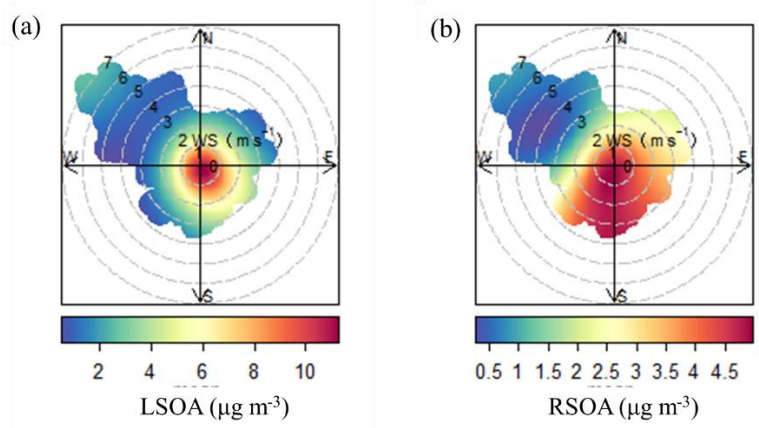

Figure S5. Bivariate polar plots of LSOA (a) and RSOA (b) as functions of wind direction and wind speed (m s^{-1}) during the entire study period.
