The work relies heavily on the detailed mechanism PRAM (peroxy radical autoxidation mechanism, Roldin et al., 2018) you refer to several times. Unfortunately, 'Roldin et al., 2018' is not listed in the reference list; instead (?) 'Roldin et al., 2019 in review' is listed but not cited.

In order to make it easier for reviewers and other readers to evaluate your study in light of the underlying mechanism, it is essential to have access to the cited paper or, at least, to the mechanism as a separate source (e.g. a link to a website).

C1

Please (i) clarify the mix-up in the references and (ii) give detailed information on PRAM in a response to this comment.
