

***Interactive comment on “The wet deposition of the inorganic ions in the 320 cities across China: spatiotemporal variation, source apportionment, and dominant factors” by Rui Li et al.***

**Anonymous Referee #2**

Received and published: 13 June 2019

I noticed that the authors improved their manuscript substantially after careful revision based on reviewer's comments. I am satisfied at their revision. The paper now can be accepted for publication in ACP as its current form.
