Received and published: 8 August 2019

The authors may want to consider referencing the recent paper by Creamean et al. (2019) whereby they report INP concentrations from aerosol, rime, and fresh fallen snow samples at Jungfrauoch:

Creamean, J. M., Mignani, C., Bukowiecki, N., and Conen, F.: Using freezing spectra characteristics to identify ice-nucleating particle populations during the winter in the Alps, *Atmos. Chem. Phys.*, 19, 8123-8140, <https://doi.org/10.5194/acp-19-8123-2019>, 2019.
