

# ***Interactive comment on* “Enhanced growth rate of atmospheric particles from sulfuric acid” by Dominik Stolzenburg et al.**

**Dominik Stolzenburg et al.**

dominik.stolzenburg@helsinki.fi

Received and published: 13 December 2019

We thank Chris Hogan for thoroughly checking our manuscript on potential errors in the analysis. This will certainly help improving the quality and validity of the presented results.

We compiled our answers in the Supplement to this Comment, in order to clarify our derivations. We will provide exact details on the specific changes for a revised version of the manuscript together with the answers to the nominated Anonymous Referees at a later stage.

Please also note the supplement to this comment:
