Dear reviewer#1 and editor:

On behalf of all co-authors, we are really grateful to reviewer#1 who spent much time reviewing the original manuscript. I know we have made some misleading narratives and have modified those in the revised manuscript. After all reviewers' comments are replied, the authors will ask an English language editing company to revise the manuscript. We know it is impossible but we hope the final manuscript could be like an article written by a native English writer. In this response, we have attached a file called “reply.20200217.MC1” which is the author's one-to-one reply for reviewer's comments.

We welcome any further comments from reviewer#1. Thanks. Sorry that it was the first time the first author submitted a manuscript to ACP. They should not upload the revised manuscript but they did in the last reply. Please ignore it.

Best regards.

Ming-Tung Chuang
