

Review ACP-2019-796

The authors addressed the remarks and suggestions made by the referees in a appropriate manner. Some minor issues with formulations remain of which some are probably subject to the final typesetting and language check process.

1 technical corrections

- P5 L22-24: "*For EMAC data, we use [...]*" and P5 L28-30: "*For the results presented, [...]*" The "so-called specified dynamics mode" is now explained twice in the same paragraph. The authors should merge those two sentences.
- P6L35: "*[...] was lower by up to 5 ppt lower [...]*" Repetition of "lower".
- P10 L5: "*hese simulations [...]*" A "T" is missing here.
- P12 L1: "*this will result [...]*" $t \rightarrow T$
