

# ***Interactive comment on “Robust observational constraint of uncertain aerosol processes and emissions in a climate model and the effect on aerosol radiative forcing” by Jill S. Johnson et al.***

## **Anonymous Referee #2**

Received and published: 12 May 2020

This manuscript investigates the constraint on aerosol forcing uncertainties by observations of AOD, PM<sub>2.5</sub>, particle number concentrations, sulphate and organic mass concentrations. The manuscript is scientifically sound, and of a high scientific quality. In my opinion, the manuscript is ready for publication in ACP, since it presents not significant shortcomings in the scientific significance or quality.
