

Dear Dr. Dubey,

We would like to resubmit our manuscript "*Carbonaceous aerosol composition in air masses influenced by large-scale biomass burning: a case-study in Northwestern Vietnam*" for your consideration in the Special Issue *The role of fire in the Earth system: understanding interactions with the land, atmosphere, and society*. We have included the two suggested publications on brown carbon on line 428 and following and look forward to your decision.

Sincerely,

Hendryk Czech
