

*Supplement of*

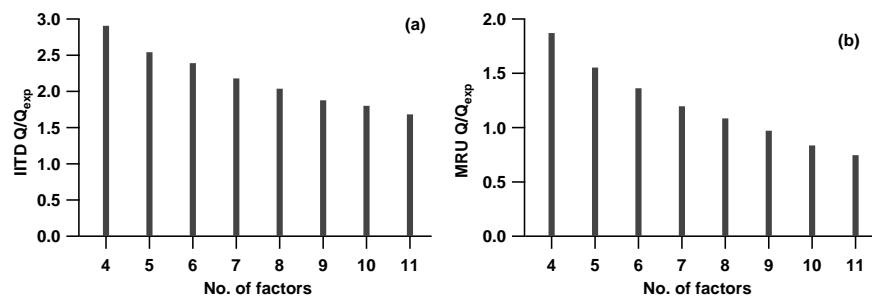

## **Source characterization of volatile organic compounds measured by PTR-ToF-MS in Delhi, India**

**Wang et al.**

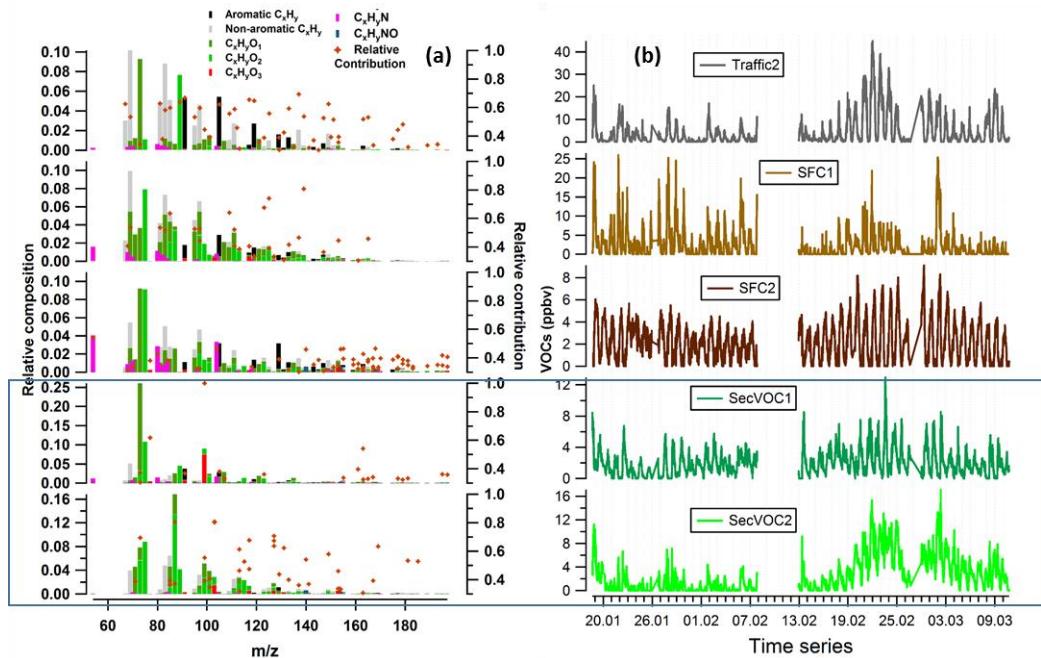

*Correspondence to:* André S. H. Prévôt and Sachchida N. Tripathi

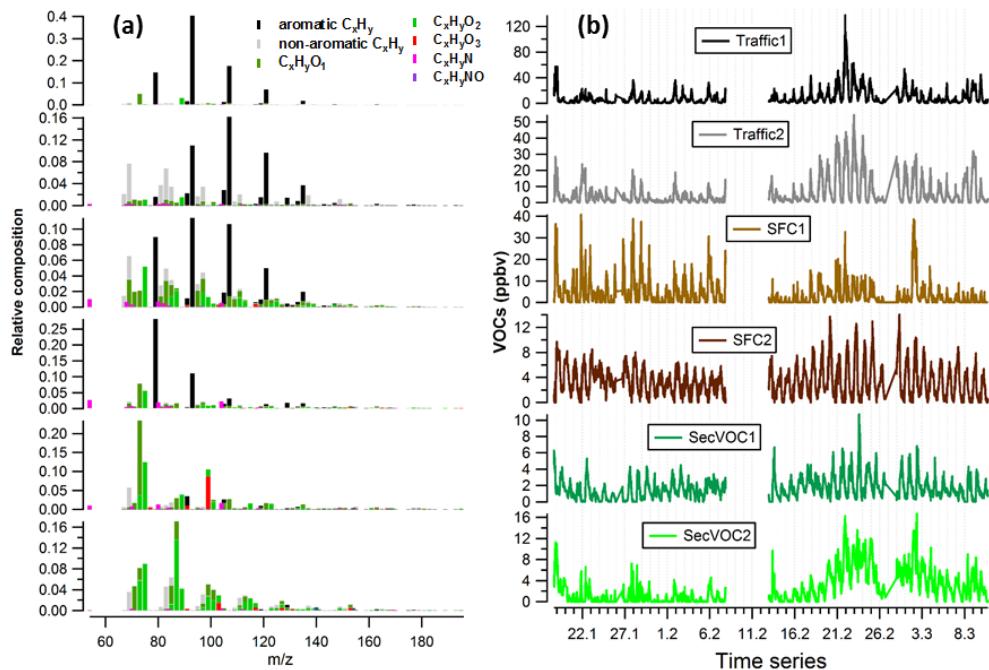

**Fig. S1** Mean diurnal cycles of temperature of the cold and warm seasons

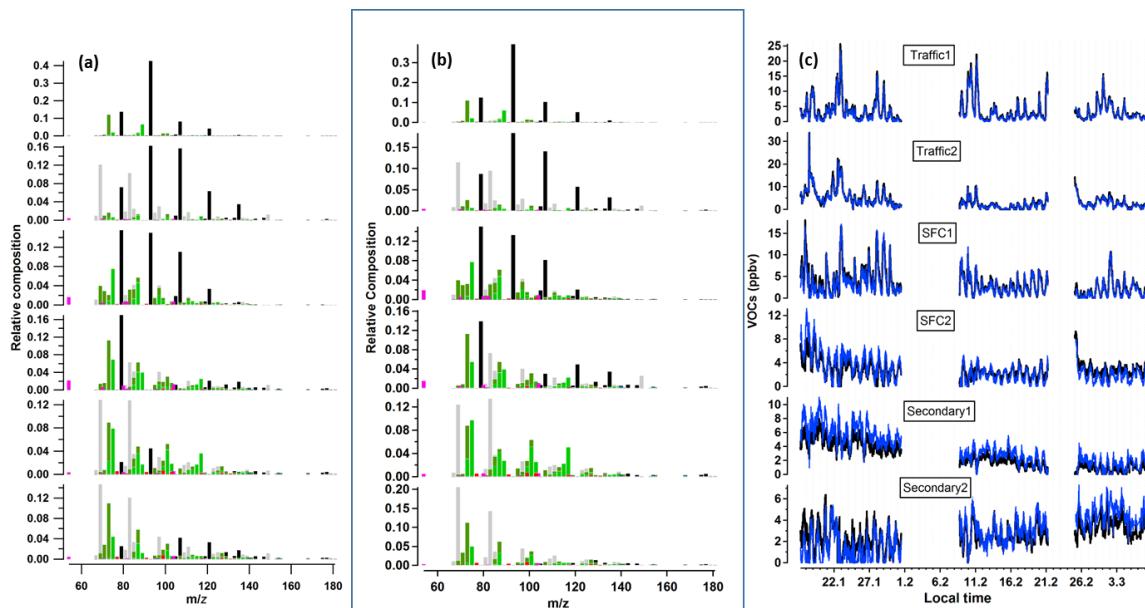

**Fig. S2**  $Q/Q_{exp}$  plots vs number of factors of (a) IITD and (b) MRIU.

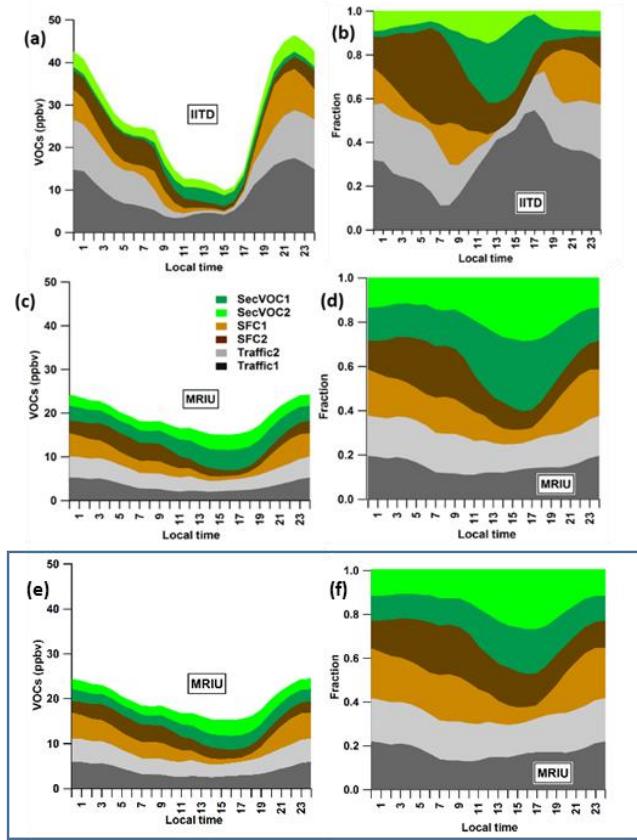

**Fig. S3** PMF results at IITD with the input of 154 ions (excluding  $C_6H_6H^+$ ,  $C_7H_8H^+$ ,  $C_8H_{10}H^+$ , and  $C_9H_{12}H^+$ ), showing (a) factor profiles (b) factor time series. The selected secondary factors are labeled in the blue box.

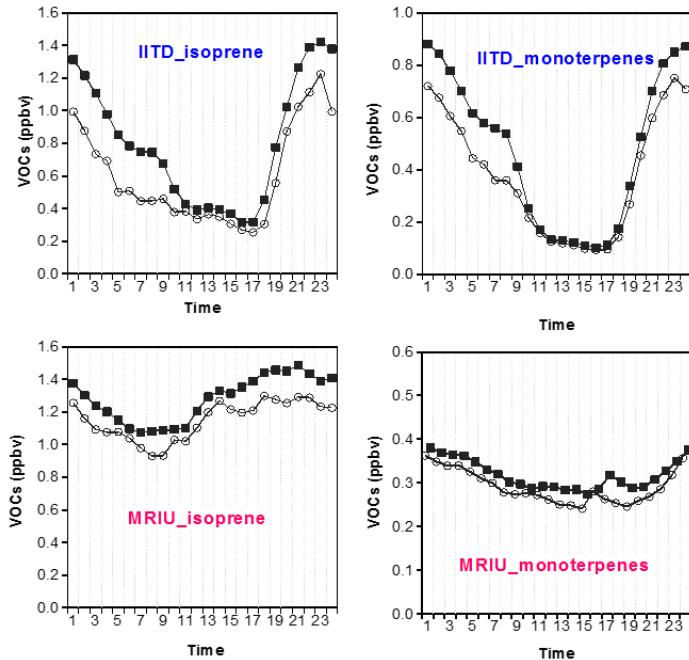

**Fig. S4** Averaged PMF results at IITD with the a-value ranging from 0.1-0.3, showing (a) factor profiles (b) factor time series.

**Fig. S5** (a) Factor profiles of raw PMF result at MRIU. (b) Factor profiles of PMF result at MRIU by constraining the two secondary factors as applied at IITD. (c) Factor time series of the two PMF results at MRIU, with the blue lines showing the unconstrained PMF results (corresponds to a), and the black lines showing the constrained results (b).

**Fig. S6** Diurnal patterns of factor concentrations and contributions (a) at IITD, (b) raw result at MRIU, and (c) constrained result at MRIU.

**Fig. S7** Diurnal patterns of isoprene and monoterpenes at the two sites. The squares represent the mean values and the circles represent median values.

**Table S1** List of ions and averaged mixing ratios included in the PMF analysis at IITD

| Ion exact m/z (Th) | Ion formula           | Averaged mixing ratio (ppbv) |         |                       |       |
