Calculation of Vapor Wall Loss

$$\bar{c} = \sqrt{\frac{8RT}{\pi M_w}} \quad (1)$$

30 where R was the ideal gas constant (i.e., $8.314 \text{ J mol}^{-1} \text{ K}^{-1}$), T was the temperature, M_w was the molecular weight.

$$D_{\text{gas}} = D_{\text{CO}_2} \times \frac{M_w \text{CO}_2}{M_w} \quad (2)$$

where D_{CO_2} was $1.38 \times 10^{-5} \text{ m}^2 \text{ s}^{-1}$, M_w was set to 300 g mol^{-1} here.

$$k_n = \frac{\lambda}{R_p} = \frac{6D_{\text{gas}}}{D_p \bar{c}} \quad (3)$$

where K_n was the Knudsen number, R_p was the particle radius, and λ was the gas mean free path.

$$35 \quad \bar{F}_{\text{FS}} = \frac{0.75\alpha(1+k_n)}{k_n^2+k_n+0.283k_n\alpha+0.75\alpha} \quad (4)$$

where α was the mass accommodation coefficient onto particles, and it was set to 0.002 in this work (Zhang et al., 2014).

Table S1. $\bar{\tau}_{\text{g-p}}/\bar{\tau}_{\text{g-w}}$ values for the VOCs used in this work.

VOC	AS Seed (Yes or No)	Temperature (°C)	$\bar{\tau}_{\text{g-p}}/\bar{\tau}_{\text{g-w}}$
1,3,5-TMB	No	35	2.64-4.42
<i>n</i> -dodecane	No	35	4.25-7.34
Mix	No	35	0.19-0.85

40 **Table S2. Initial concentrations of the conducted experiments.**

Date	Precursor	Concentration (ppb)	TMB/Dode	NO _x (ppb)	$\Delta \text{VOCs}/\text{NO}_x$
2019.0927	<i>n</i> -dodecane	22	--	210	1.26
2019.1009	<i>n</i> -dodecane	20	--	214	1.12
2019.0925(Li et al., 2021)	1,3,5-TMB	178	--	197	8.13
2019.1014(Li et al., 2021)	1,3,5-TMB	170	--	250	6.12
2019.0903(Li et al., 2021)	1,3,5-TMB	105	--	211	4.48
2019.0907	Dod+TMB	28+168	6	231	8
2019.0921	Dod+TMB	22+155	7	212	7.83
2019.0919	Dod+TMB	20+182	9.1	218	8.61

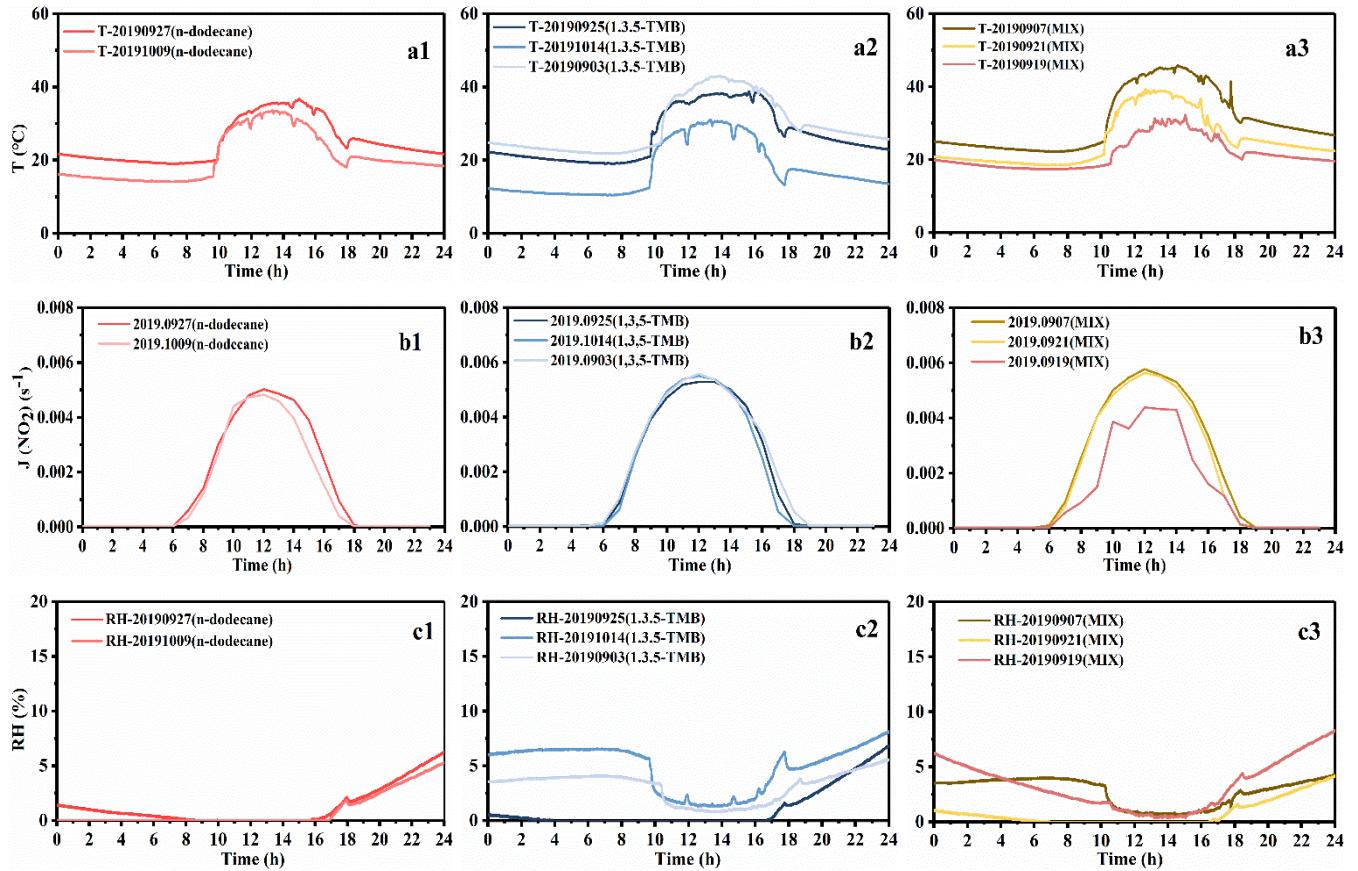

Figure S1. The temperature (T, a), the NO₂ photolysis rate of the experiments (J(NO₂), b), and relative humidity (RH, c); the data of 1,3,5-TMB was referred to Li et al. (2021) in summer.

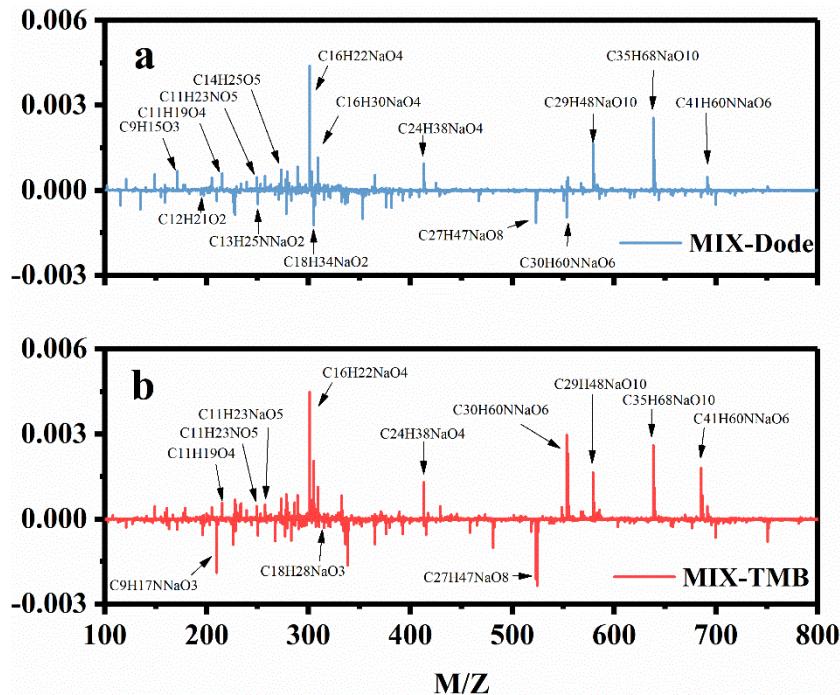

Figure S2. Results of mass spectra difference in (a) mixed AVOCs SOA minus *n*-dodecane SOA, and (b) mixed AVOCs SOA minus

50 **1,3,5-TMB SOA. The Y-axis is the relative intensity normalized by dividing by the total signal strength of the mass spectra.**
