

1

Supplementary Figures

2

3 **Figure S1: Long-term mean cloud fraction and estimated cloud**
 4 **albedo from the 29 AMIP6 models and satellite observations during**
 5 **2003-2014.**

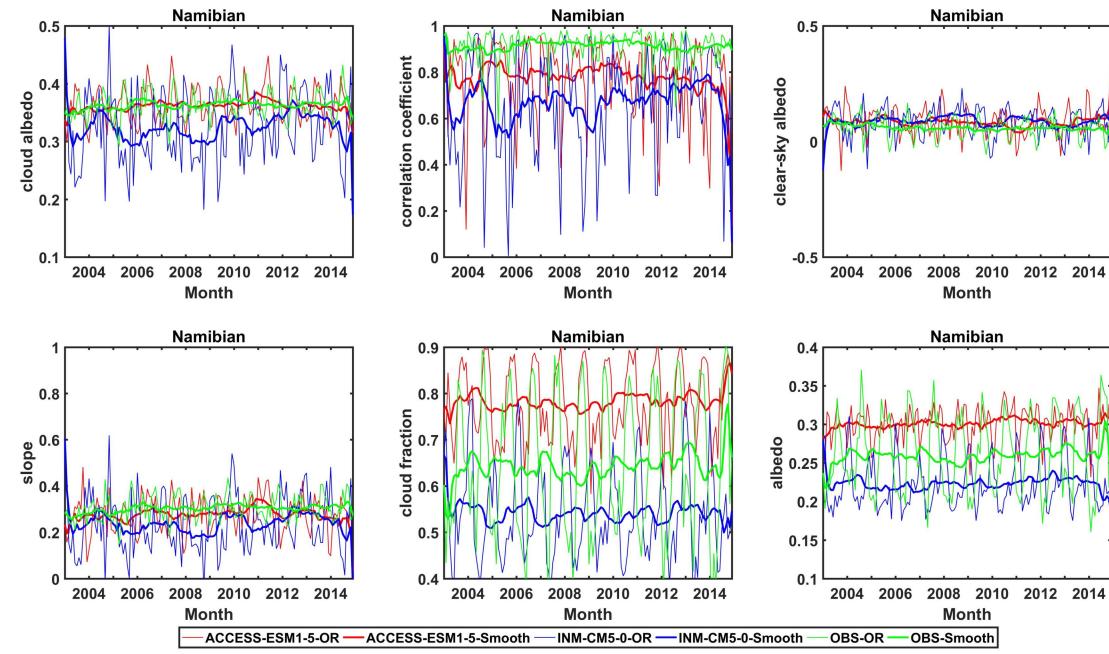

6

7 **Figure S2: Monthly mean time series of correlation coefficient**
8 **between cloud fraction and planetary albedo (a-e) from AMIP5 and**
9 **AMIP6 multimodel ensemble mean during 2003-2008, and (f-j) from**

10 **AMIP6 multimodel ensemble mean during 2003-2014 compared with**
11 **satellite observations, over the (a, f) Peruvian, (b, g) Namibian (c, h)**
12 **Californian, (d, i) Australian and (e, j) Canarian regions.**

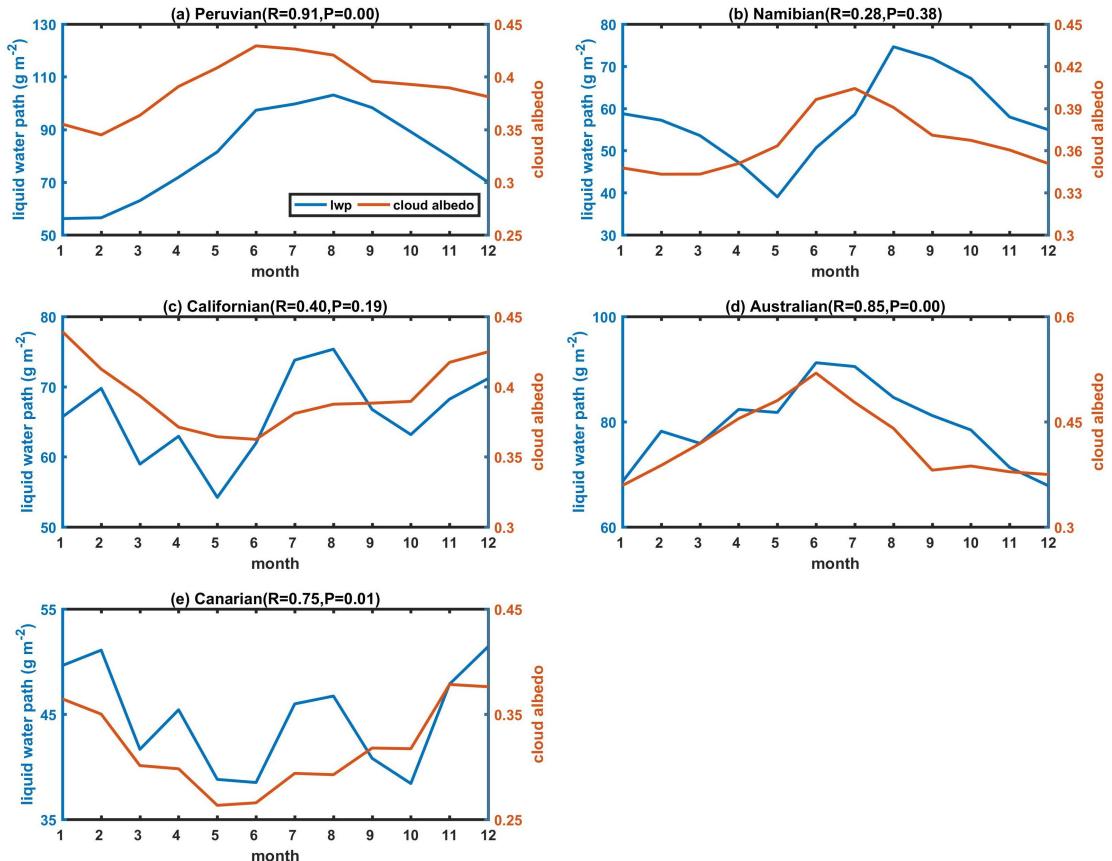

13

14

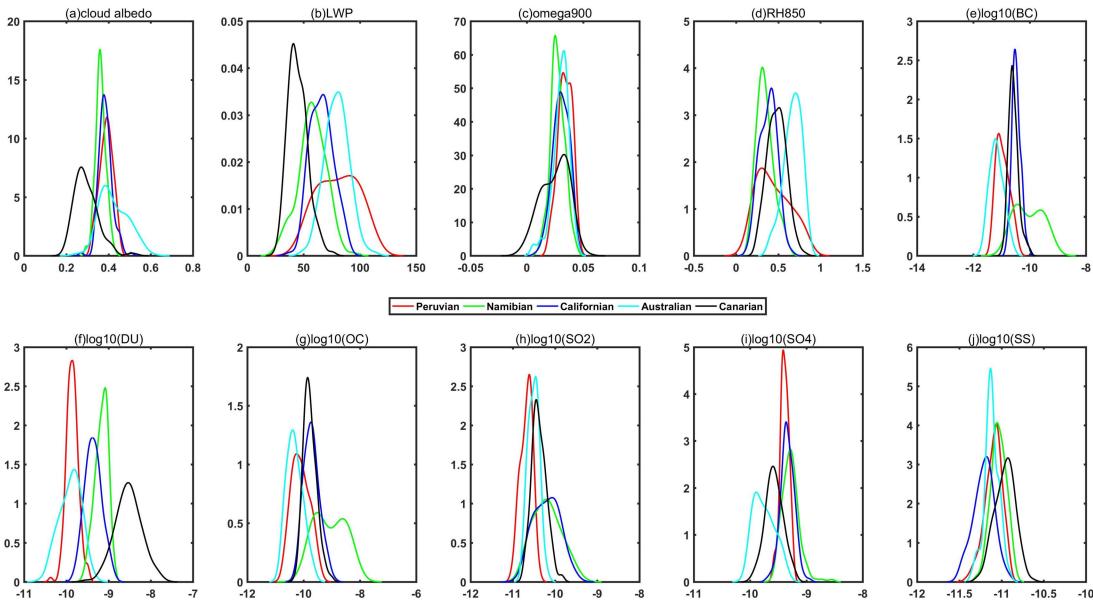

15 **Figure S3: Monthly mean time series of estimated cloud albedo,**
16 **correlation coefficient between cloud fraction and planetary albedo,**
17 **clear-sky albedo, regressed slope, cloud fraction and planetary**
18 **albedo over the Namibian region from 2 models compared with**
19 **satellite observations.**

20

21

22 **Figure S4: Annual cycles of the estimated cloud albedo and LWP**
 23 **from satellite observations during 2003-2014 over the (a) Peruvian, (b)**
 24 **Namibian, (c) Californian, (d) Australian, (e) Canarian regions. The**
 25 **temporal correlations (R value) and P value (if P<0.10, indicating the**
 26 **correlation R is significant) between cloud albedo and LWP are given**
 27 **in parentheses.**

28

29 **Figure S5: The probability density functions (PDF) of (a) cloud albedo, (b)**
 30 **LWP, (c) omega900, (d) RH850 and (e-j) log10 mass concentrations of different**
 31 **aerosol types over the five stratocumulus regions.**
