Interactive comment

Interactive comment on "Measurement report: Characteristics and sources of non-methane VOCs and their roles in SOA formation during autumn in a central Chinese city" by Haixu Zhang et al.

Haixu Zhang et al.

zhanghaixu@tsinghua.edu.cn

Received and published: 23 July 2020

Thanks to the editor for guiding through the editorial process. We would like to thank the both referees for their careful review and valuable comments. According to the comments, the methodologies have been modified and optimized, with the corresponding reliability tests demonstrated. Besides, the confusing phrases have been corrected and the value of this work has been emphasized. The point-to-point responses can be found in the supplemented file.

Please also note the supplement to this comment:
