Interactive comment on "Ship-based measurements of ice nuclei concentrations over the Arctic, Atlantic, Pacific and Southern Ocean" *by* André Welti et al.

Anonymous Referee #2

The authors provide an overview of ship based INP measurements spanning from the Arctic to the Southern Ocean. Measurements were conducted using droplet freezing techniques and continuous flow diffusion chambers allowing to assess a wide range of freezing temperatures. Additionally, attention is paid to potential influences of ship stack emissions on the INP counts; a relevant information for the analyzed data and planning for future ship based INP measurements. What makes this manuscript particularly valuable is that the authors include literature reported data points for various measurement locations. Thus, providing an overview of to date available marine INP measurements which the field can build up on to improve the understanding of the relevance of these INP types.

The manuscript is very well organised and well written. I recommend publishing this manuscript after addressing the following comments:

Specific comments:

Section 3 titled 'Worldwide coverage of maritime observations' needs to also include literature which reported INP measurements in marine environments but is not included in the data analysis presented in this manuscript. The manuscript and particularly section 3 appear as an overview of INP measurements done to date in maritime environments and with this should include all relevant literature e.g. I noticed the following references are missing for this section:

Technical comments:

P.3 L.27 Avoid beginning the sentence with a number – if so, it should be hyphenated here

P.4 L.24 Same here – avoid number at beginning of the sentence. Rearrange sentence

P.4 L.30 mid-September should be hyphenated

P- 8 Figure 3 Mention the 'zero line' in the caption for easier reference to it in the text

Appendix C According to the text on P. 9 L14, the title of Appendix C should read '…
≥-20°C'

P. 15 L 10 correct the spelling of 'transit cruise'
