Revised Manuscript: acp-2020-508 (2)

Dependence of Predictability of Precipitation in the Northwestern Mediterranean Coastal Region on the Strength of Synoptic Control

by C. Keil et al.

Dear Editor,

please find attached a second revised version of the above submission to ACP. We are grateful for the positive and constructive criticism that the reviewers made on our submission. We carefully looked at grammar issues throughout the text and incorporated all points raised by Referee 1. With your help, we were able to further improve our manuscript.

We hope that the paper is now acceptable for publication.

Yours faithfully,

Christian Keil

Revised Manuscript: acp-2020-508 (2)

Dependence of Predictability of Precipitation in the Northwestern Mediterranean Coastal Region on the Strength of Synoptic Control

by C. Keil et al.

Dear Editor,

Here a point-by-point response you were asking for:

* Editor's comment on area size

Action: Added river catchment alternative in Section 2.2

* Referee 2 comments:

1) Manuscript carefully re-read focussing on grammar issues. E.g. added 'the' or 'a' at various places, changed 95th percentile without 's' throughout the text. Done.

2) Wording in abstract corrected. Done.

3) Added sentence like 'examined sub-domains and got similar results' in Section 2.2 and mention to stay below the Rossby Radius of Deformation $O(1000\text{km})$. Done.

3 and 4) Text accordingly corrected.

5) Added '(see Fig. 1 for geographical landmarks)' in Sections 3 and 4 to help the reader navigate in that area.

6) Added 'overconfidence could still come from a wet bias or a tendency to have too much spatial agreement.' in the text.

7) Inserted 'than' twice as reviewer suggested.

That's all.

Kind regards,

Christian
