Dear Colleagues,

In the access review prior to publication of the preprint/discussion paper in ACPD, three reviewers rated the manuscript as good or excellent in all review criteria. Only one of the reviewers, however, followed up with a full review and public comments. In spite of numerous reminders and calls for additional reviewers, it was unfortunately not possible to obtain another review and public comments in due time.

Thus, I recommend to revise and optimize the manuscript in response to the thorough review and constructive comments of Anonymous Referee Point 1. Additional reviewers may be consulted upon peer review completion for the revised manuscript.
