

Interactive comment on “Study of second-order wind statistics in the mesosphere and lower thermosphere region from multistatic specular meteor radar observations during the SIMONE 2018 campaign” by Harikrishnan Charuvil Asokan et al.

Anonymous Referee #2

Received and published: 18 December 2020

The reviewer noticed a typo in the ERP power of the Tromso heater. It has 54 GJ ERP and not as written in the comment 54000GJ. Using the ERP numbers from Blagoveshchenskaya et al., 1998.

The reviewer feels sorry, for the this additional comment.
