

**Manuscript ID:** acp-2021-758 (2<sup>nd</sup> Revision)

**Authors:** María Asensio, María Antañolo, Sergio Blázquez, José Albaladejo, Elena Jiménez

**Ms. Title:** Evaluation of the daytime tropospheric loss of 2-methylbutanal.

**General Comments:**

The authors did an excellent work to address all the suggestions/corrections and comments and the present reviewer believes that the present form of the manuscript meets the high standards of ACP and can be published as is. The only remaining issue is related to tables and graphs units presentation. A minor comment that also noted previously, it would be easier for the reader to see the units in parenthesis without math signs, e. g., instead of Wavenumber /cm<sup>-1</sup>, use Wavenumber (cm<sup>-1</sup>). However, this is a minor technical change and does not affect the high quality of the paper.

**Suggestion:** Published as is
