

Dear Editor,

We would like to thank you for accepting our paper, “Canadian and Alaskan Wildfire Smoke Particle Properties, Their Evolution, and Controlling Factors from Space-Based Observations,” for publication in Atmospheric Chemistry and Physics. During the final proofreading process, we found it necessary to make small content changes to the Supplement, per guidance from the typesetter as well as to remedy a typo. We kindly ask that you review these changes and allow us to replace the Supplement pdf with the updated version. The changes are listed below:

- 1) The typesetter comment TS21 requested the following:

“Please send a new supplement as a *.pdf without the title, authors, correspondence author, etc. as we will generate a supplement title page during publication (with a citation including the DOI), which will contain this information.”

We therefore deleted the title “Supplementary Material” and the subtitle “Canadian and Alaskan Wildfire Smoke Particle Properties, Their Evolution, and Controlling Factors from Space-Based Observations” at the top of the first page.

- 2) Table S1 (page 1) contains detailed quantitative particle property information used in our retrieval algorithm. In the second column from the right (header r_1), there are five rows in which the cell value was erroneously set to 1.25. The true value is 1.5, and we have made this correction. Note that this change has no impact on the content of our paper.

Apart from those listed above, no other changes were made to the Supplement. Thank you and we look forward to hearing from you.

Sincerely,

Dr. Katherine T. Junghenn Noyes
