

Dear Editor,

During the proofreading, we found an error in figure 5b. Figure 5 shows the variation of heating rates at peaks and nadirs related to Figure 4. In Fig.5b the radiative heating rate (the purple column) in Nov. shows a wrong value. We found an input error and we have corrected it in the new figure 5. We are very sorry to have made such an uncarefully mistake. This change in figure 5 does not affect the conclusion of the manuscript. We hope that figure 5 can be replaced by the new one.

We are looking forward to your reply.

Kind regards,

Ming Shangguan and Wuke Wang
