### Supplementary

**Table S1.** Uncertainty and sensitivity analyses of top-down NH<sub>3</sub> emissions. Annual averaged NH<sub>3</sub> emissions are summed over global land areas for 2008–2018.

	Parameter perturbed	Average emission (Tg a <sup>-1</sup> )
0	TDE <sup>a</sup>	79
1	Halved lifetime <sup>b</sup>	96
2	Doubled lifetime <sup>c</sup>	71
3	Upper IASI column error	84
4	Lower IASI column error	75
5	Number of retrievals > 400 <sup>d</sup>	84
6	Number of retrievals > 1200 <sup>e</sup>	76
7	Transport/Emission < 0.2 <sup>f</sup>	74
8	Transport/Emission < 5 <sup>g</sup>	86

<sup>a</sup>Excluding a grid cell if retrieval number is less than 800 during a month, or transport dominates over emissions or depositions in the simulated monthly NH<sub>3</sub> budget.

<sup>b-c</sup>The lifetime is 50 % and 200 % of values from Eq. (1), respectively.

<sup>d-e</sup>Monthly retrieval number threshold for including a grid cell is set to be 400 and 1200, respectively.

<sup>f-g</sup>Local budget ratio the threshold for including a grid cell is set to be 0.2 and 5, respectively.

**Table 2.** Consistency evaluation of simulated NH<sub>3</sub> concentrations against IASI observations using full-chemistry simulations driven by different emission datasets (BUE1 and TDE) in 2008, 2013 and 2018.

Year	number of grids	Emission	R <sup>2</sup>	RMSE <sup>a</sup>	FB
------	-----------------------	----------	----------------	-------------------	----

		TDE	0.32	12.44	0.18
2008	9971	BUE1	0.40	7.83	-
					0.30
		TDE	0.54	7.34	0.08
2013	8957	BUE1	0.37	8.02	-
					0.19
		TDE	0.62	8.54	0.08
2018	8599	BUE1	0.31	10.55	-
					0.32

17 <sup>a</sup>In  $10^{-5} \text{ mol m}^{-2}$ .

19

20 **Figure S1.** Number of satellite retrievals by latitude and by month during 2008-2018.

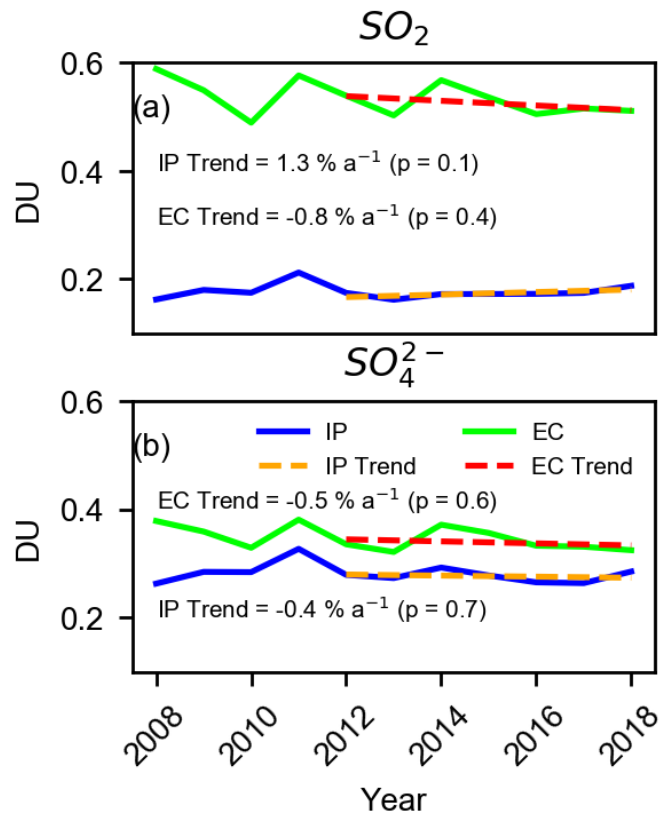

21

22 **Figure S2.** Annual anthropogenic emissions of NH<sub>3</sub>, NO<sub>2</sub> and SO<sub>2</sub> from BUE1 for seven selected regions between  
 23 2008-2018. Average annual emissions (Tg a<sup>-1</sup>) for 2008-2013 and 2014-2018 are inset.

24

25 **Figure S3.** Spatial distribution of (a) positive transport to emission and (b) negative transport to deposition ratios  
 26 during 2008-2018.

27

28 **Figure S4.** Annual average of simulated (a)  $SO_2$  and (b)  $SO_4^{2-}$  over IP and EC (two regions in Fig. 2) during 2008-  
 29 2018. The simulation is driven by BUE1 (Fig. S2). Relative linear trends and their p values for 2012-2018 are inset.  
 30 1 DU =  $2.69 \times 10^{16}$  molecules  $\text{cm}^{-2}$ .
