

Figure S1. Correlation coefficient, R^2 between dust ratio (R_D) at wavelength 1020 nm and coarse mode fraction of the particle size distributions for each of the AERONET sites.

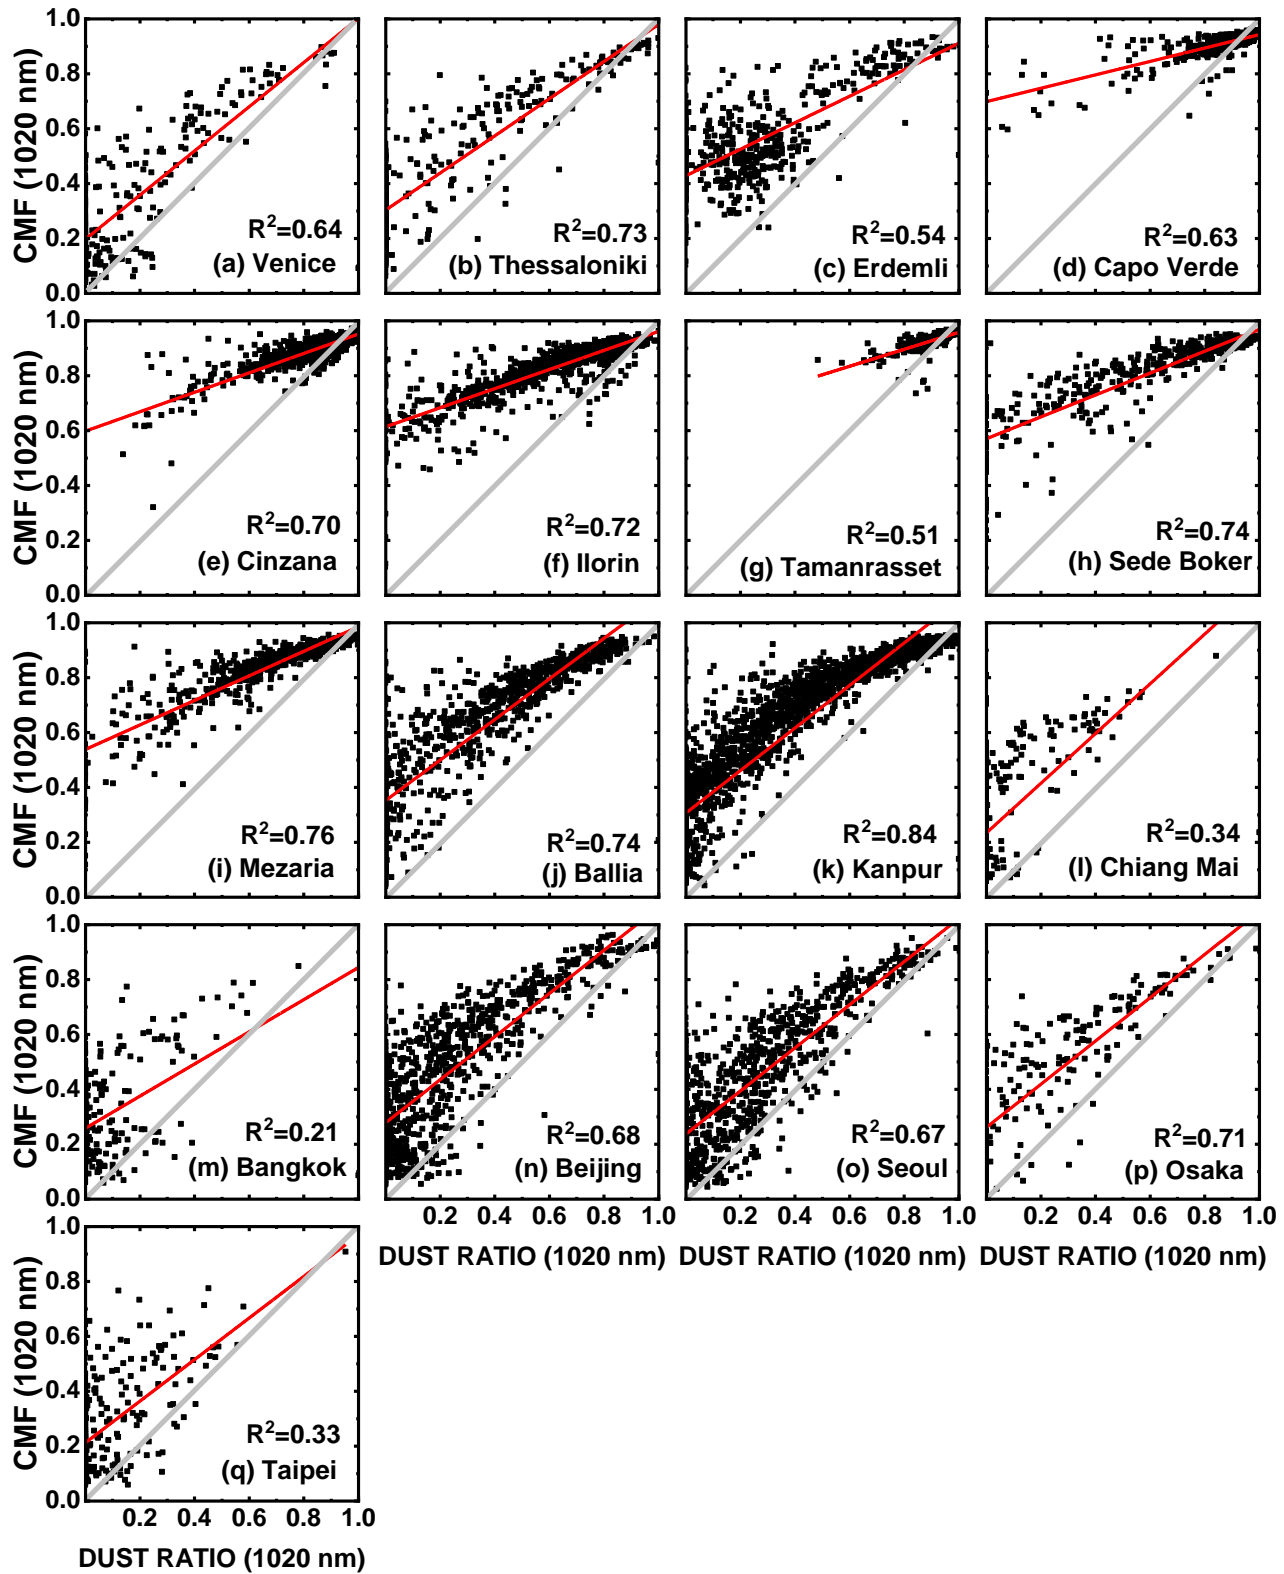

Figure S2. Annual trend of total AOD (τ_T) at wavelength 440 nm for the 17 AERONET sites for the timeframe from 2001–2018.

The dashed lines show ordinary least square regression lines.

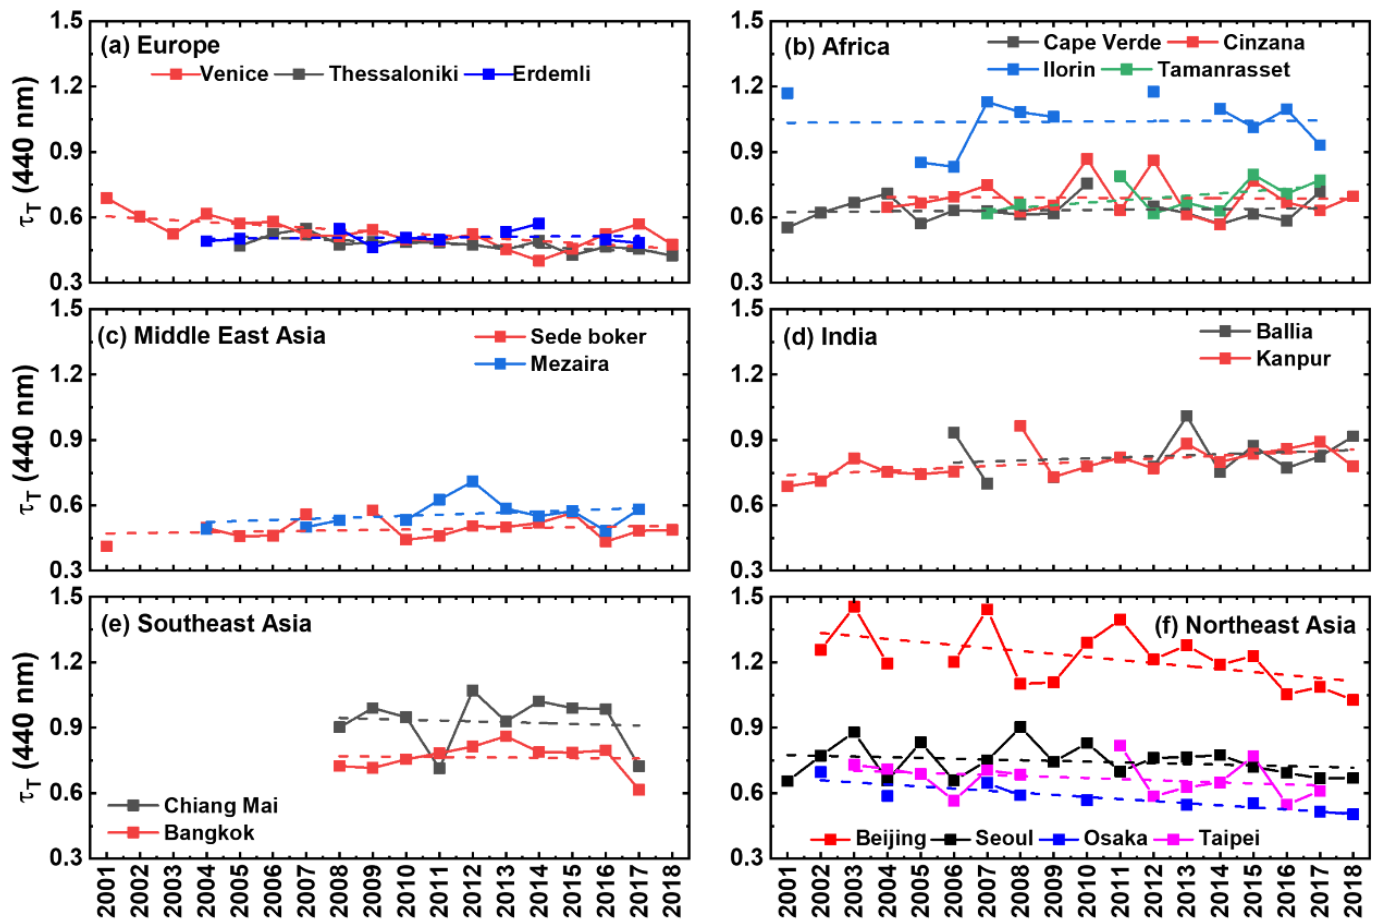

Figure S3. Annual trend of dust-only AOD (τ_D) at wavelength 440 nm for the 17 AERONET sites for the timeframe from 2001–2018. The dashed lines show ordinary least square regression lines.

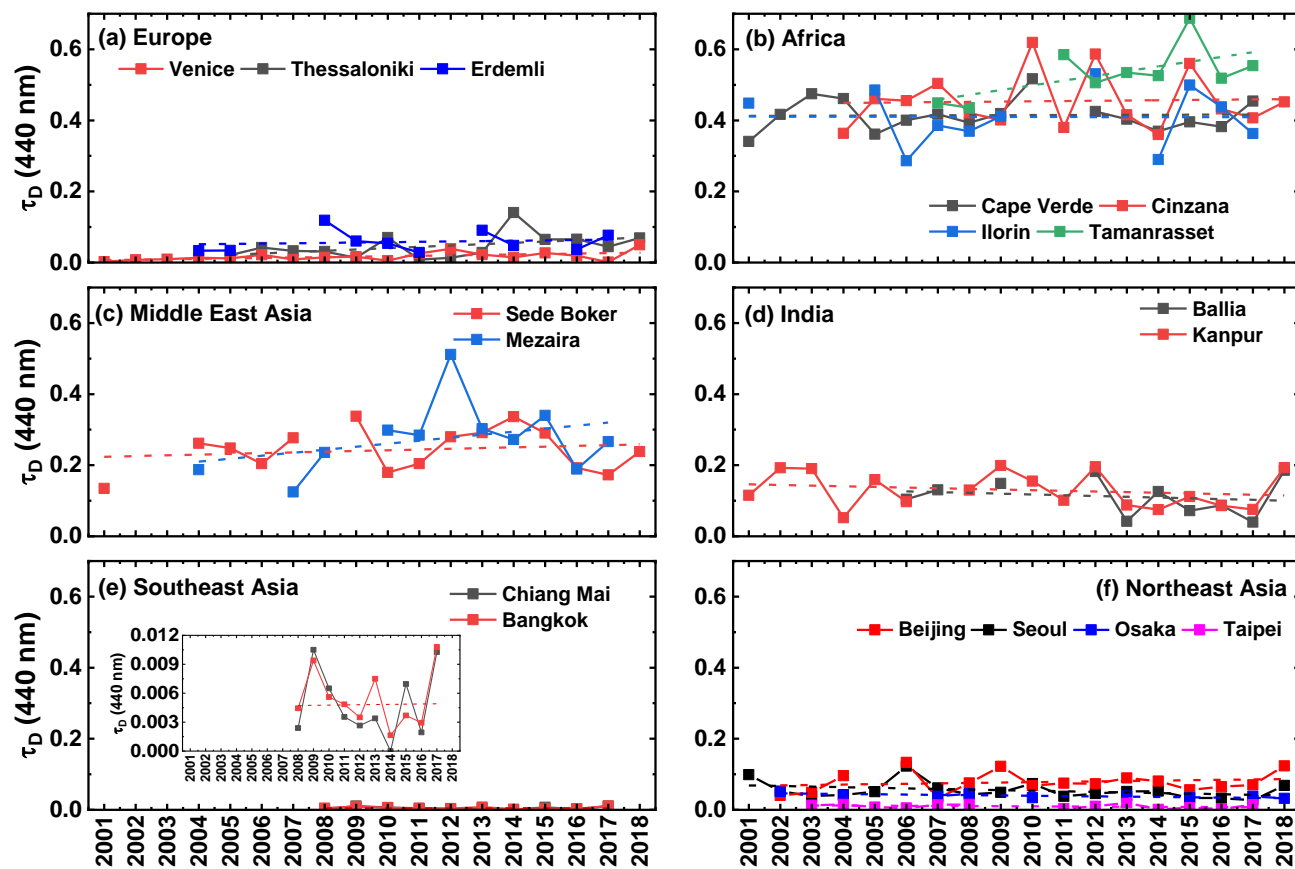

Figure S4. Annual trend of coarse-mode pollution AOD (τ_{PC}) at wavelength 440 nm for the 17 AERONET sites for the timeframe from 2001–2018. The dashed lines show ordinary least square regression lines.

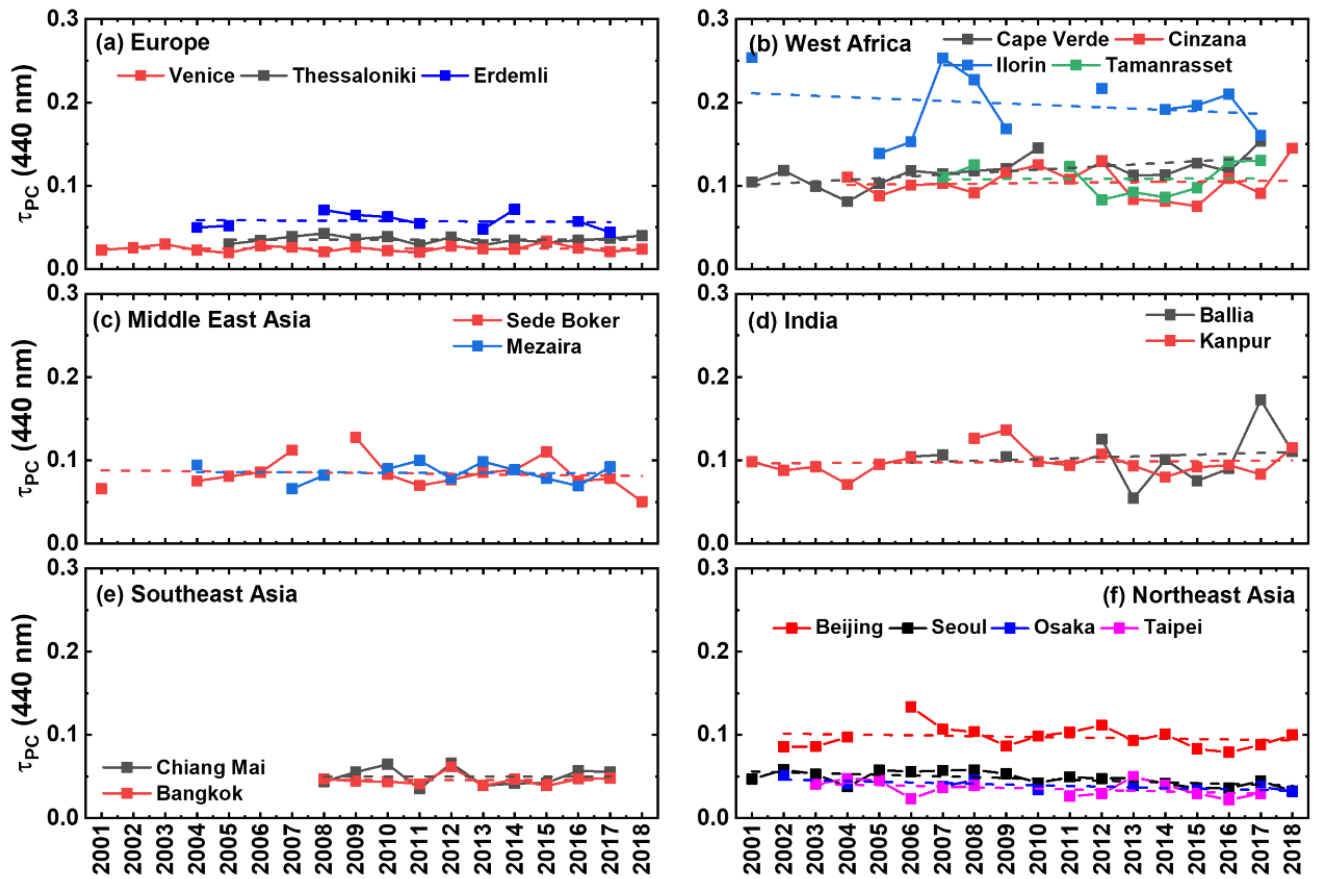

Figure S5. Annual trend of fine-mode pollution AOD (τ_{PF}) at wavelength 440 nm for the 17 AERONET sites for the timeframe from 2001–2018. The dashed lines show ordinary least square regression lines.

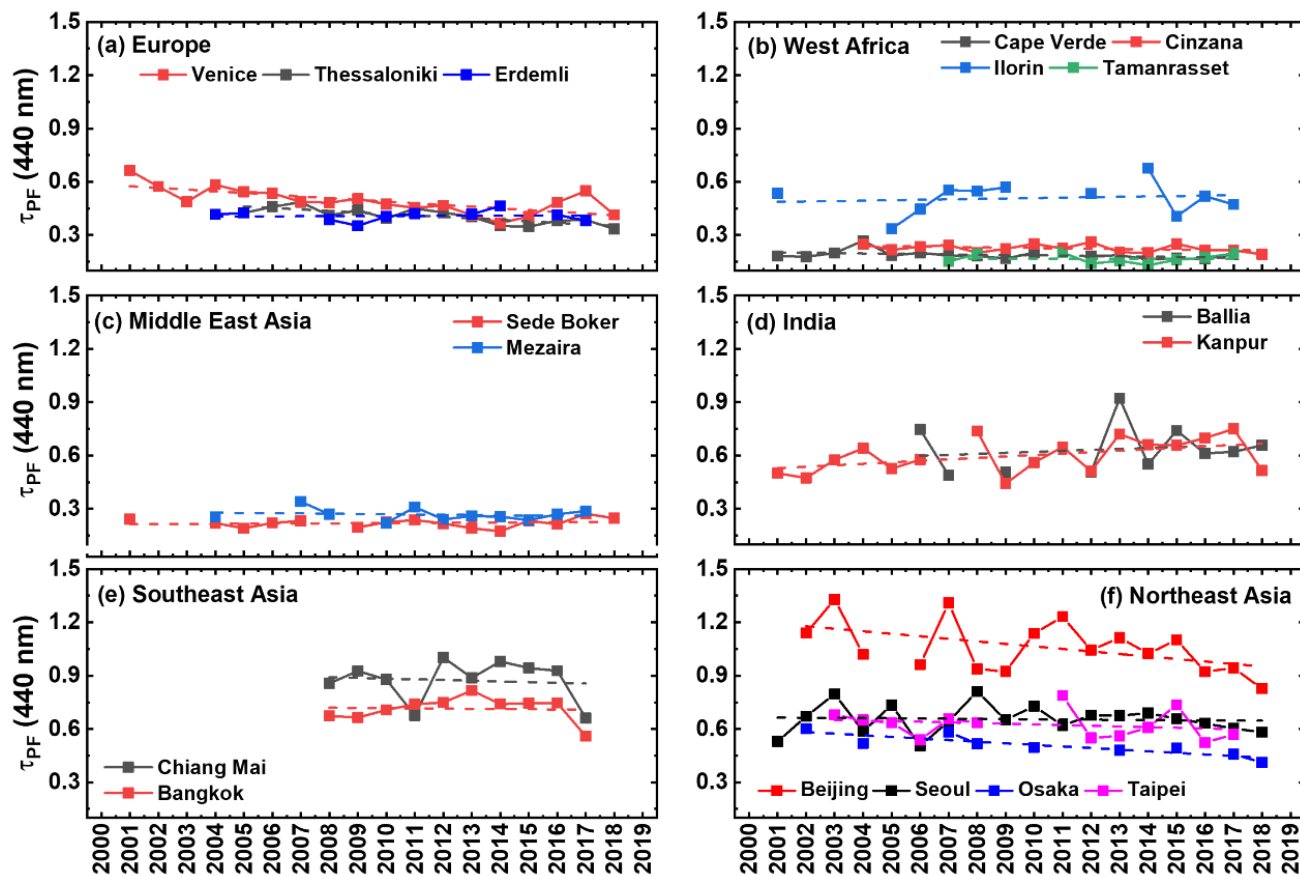

Figure S6. Annual trend of the total Ångström exponent (α_T) for the wavelength interval 440–870 nm for the 17 AERONET sites for the timeframe from 2001–2018. The dashed lines show ordinary least square regression lines.

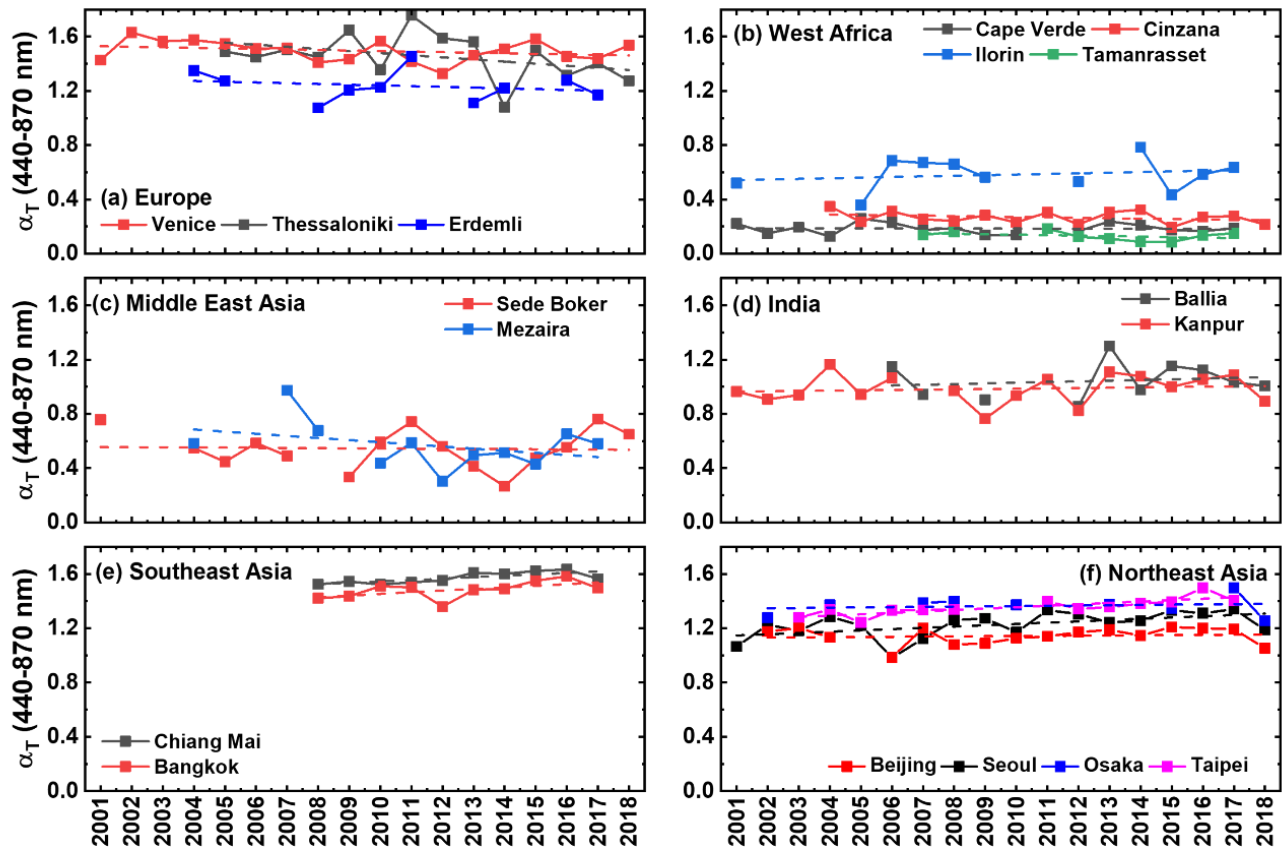

Figure S7. Annual trend of the Ångström exponent of fine-mode pollution particles (α_{PF}) for the wavelength interval 440–870 nm for the 17 AERONET sites for the timeframe from 2001–2018. The dashed lines show ordinary least square regression lines.

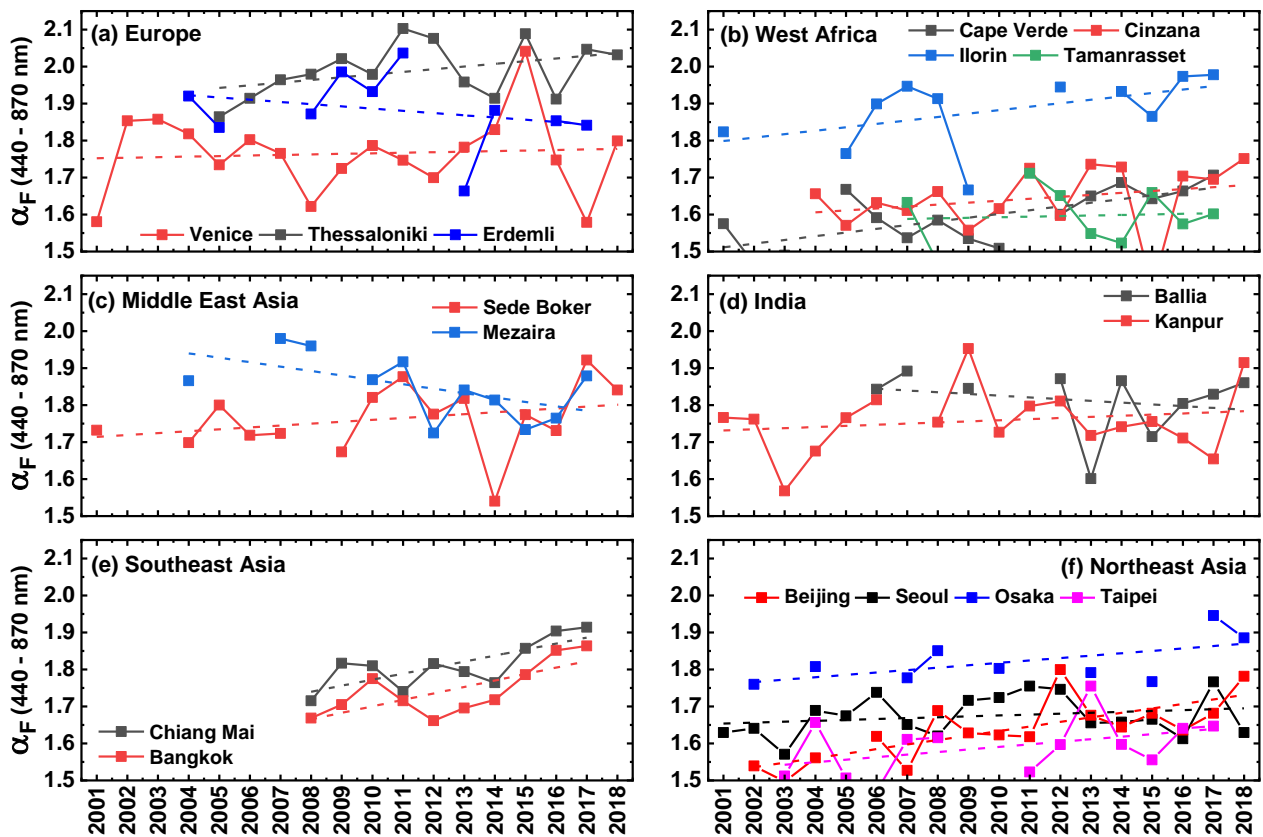

Table S1. Number of observation days in each year for the 17 AERONET Sun/sky radiometer sites (version 3 level 2.0 data)
