Supplementary Information

32

Contains 12 pages, 3 tables, 8 figures

33 In this study, Bias, MAE (Mean Absolute Error), and R (Correlation coefficient) were used to evaluate
34 the deviation between observed value and simulated value.

35 The January and April observations are from the China Meteorological Data Network
36 (<http://data.cma.cn>), which includes 659 meteorological stations in 28 provincial-level administrative
37 regions in eastern China (excluding Beijing, Xinjiang and Tibet). The July and October observations
38 are from NCDC (National Climatic Data Center, <ftp://ftp.ncdc.noaa.gov/pub/data/noaa/isd-lite/>).
39 Contains 396 sites within the simulation range.

40 Table S1 Comparison of meteorological element model simulation results and observations

		Observation	Simulation	Bias	MAE	R
Wind Speed (m s ⁻¹)	Jan.	4.00	4.11	0.11	3.91	0.68
	Apr.	4.21	4.56	0.35	3.41	0.68
	Jun.	2.50	3.70	1.20	1.60	0.39
	Oct.	2.40	3.70	1.30	1.60	0.57
Temperature (°C)	Jan.	2.50	1.63	-0.86	1.48	0.89
	Apr.	13.24	11.39	-1.85	2.46	0.81
	Jun.	24.50	23.40	-1.10	2.20	0.89
Relative Humidity (%)	Oct.	14.50	13.20	-1.30	2.20	0.92
	Jan.	71.64	59.71	-11.93	18.34	0.73
	Apr.	63.19	61.18	-2.01	12.07	0.84

41 Table S2 Ratio of various types of emission sources in January, April, July and October.

	Jan.			Apr.			Jul.			Oct.		
	MMA	DMA	TMA	MMA	DMA	TMA	MMA	DMA	TMA	MMA	DMA	TMA
Agricultural	86.8	60.2	84.8	93.2	82.6	92.9	94.6	86.2	94.4	91.5	78.9	91.1
Industrial	4.8	2.9	4.0	4.1	3.2	3.5	3.2	2.6	2.7	5.1	3.8	4.3
Power Plant	0	0	0	0	0	0	0	0	0	0	0	0
Residential	7.9	36.5	10.8	2.4	14.0	3.3	1.8	11.0	2.5	3.0	17.0	4.1
Transportation	0.5	0.2	0.5	0.4	0.2	0.4	0.3	0.2	0.3	0.5	0.3	0.5

42

43 Table S3 Changes in amine emission fluxes (Unit: %).

		Jan.	Apr.	Jul.	Oct.
Reduce	MMA	12.9	8.3	4.4	7.2
50% Chla.	TMA	2.6	3.8	2.6	2.9
Increase	MMA	-8.6	-6.6	-4.4	-7.2
50% Chla.	TMA	-2.4	-3.4	-2.1	-2.5

44

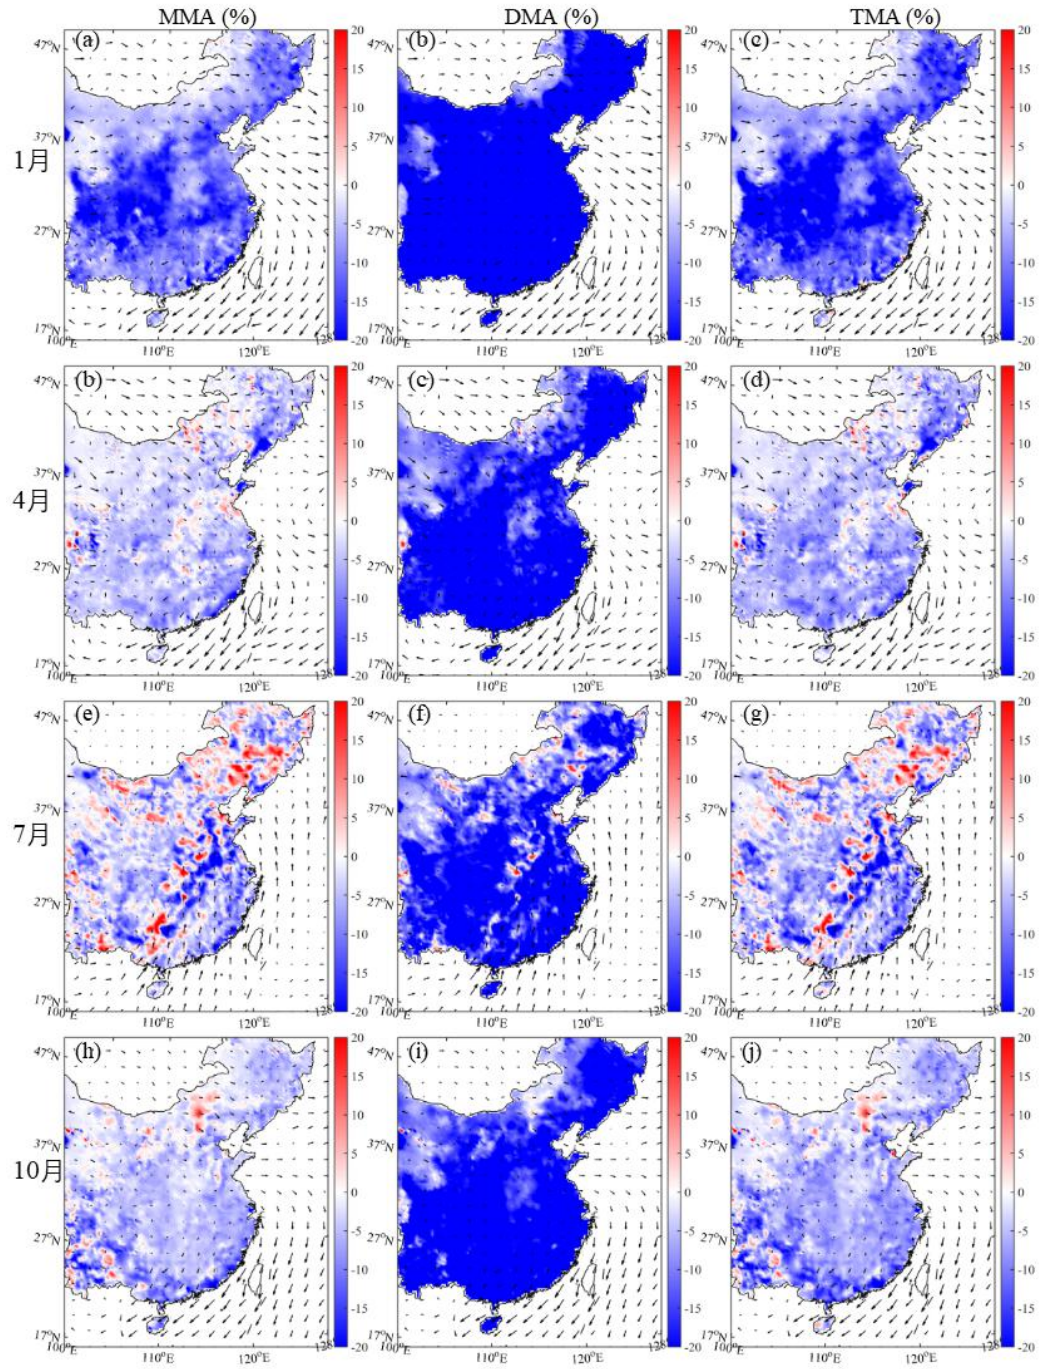

45

46 Figure S1: Spatial distribution of amines emission fluxes: (a, b, c) Agricultural emissions; (d, e, f)

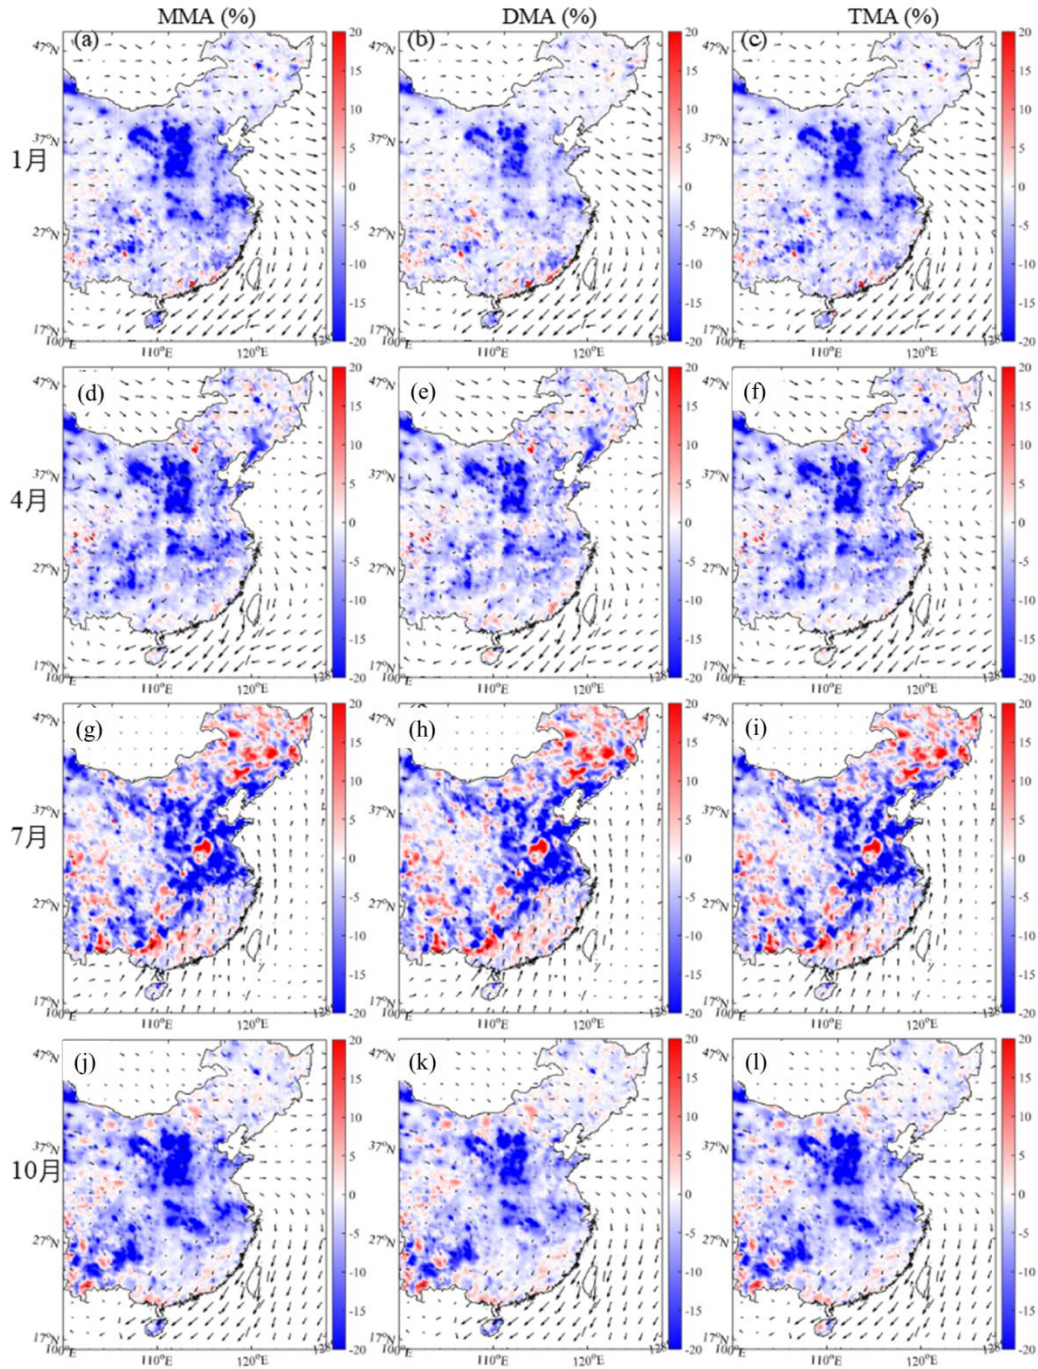

47 Power plant emissions; (g, h, i) Industrial emissions; (j, k, l) Residential emissions; (m, n, o)

48 Transportation emissions; (p, q, r) Total.

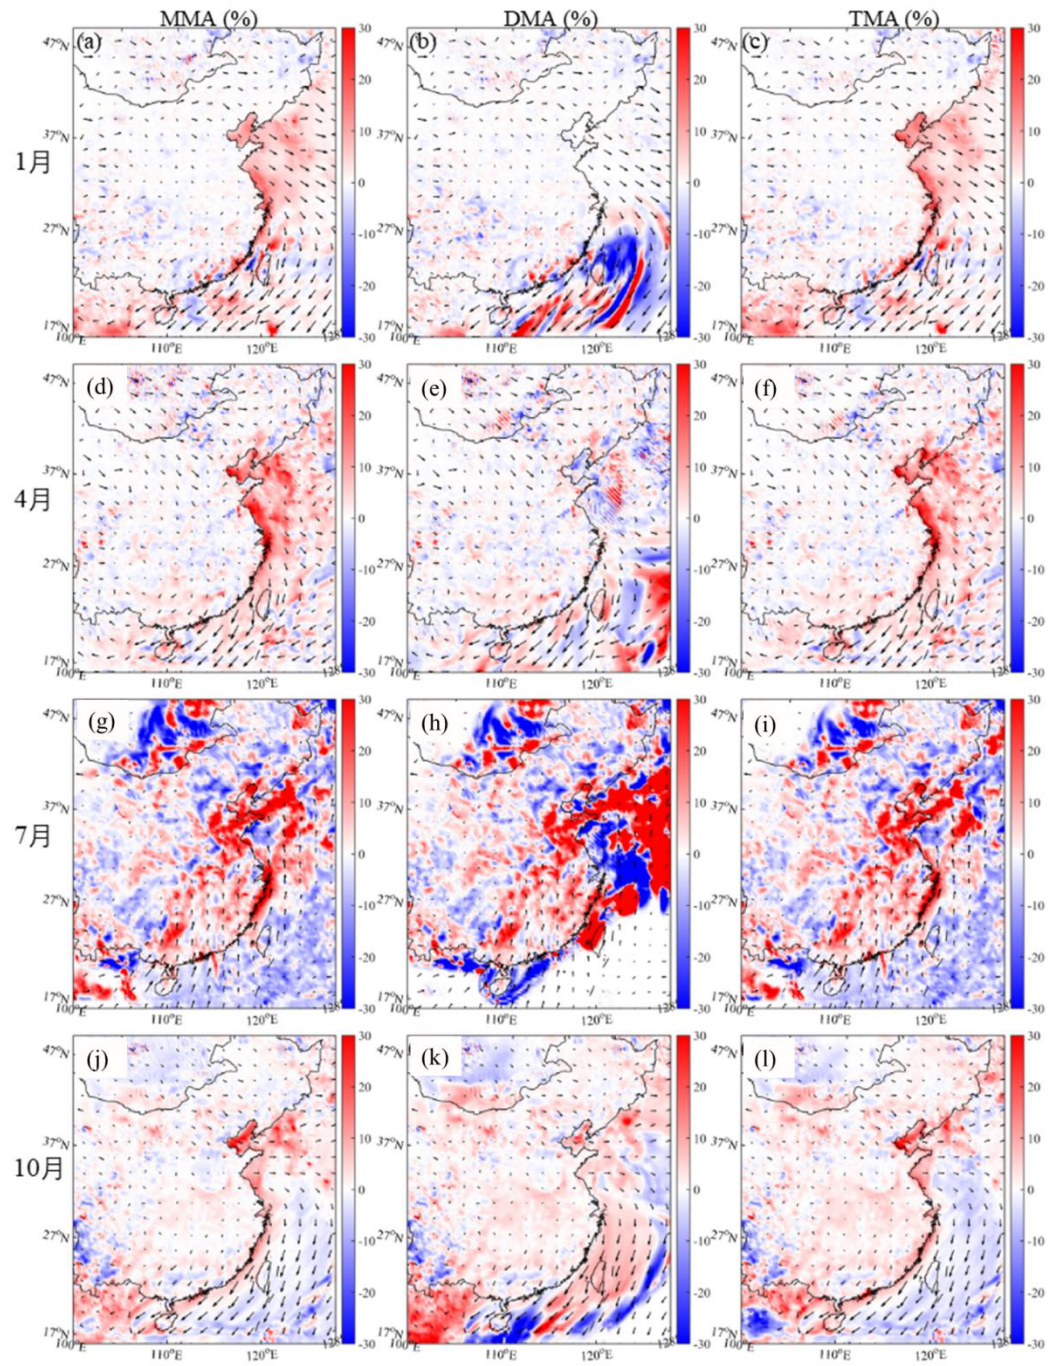

49

50 Figure S2: Changes in amine simulated concentration after reduction of residential emissions.

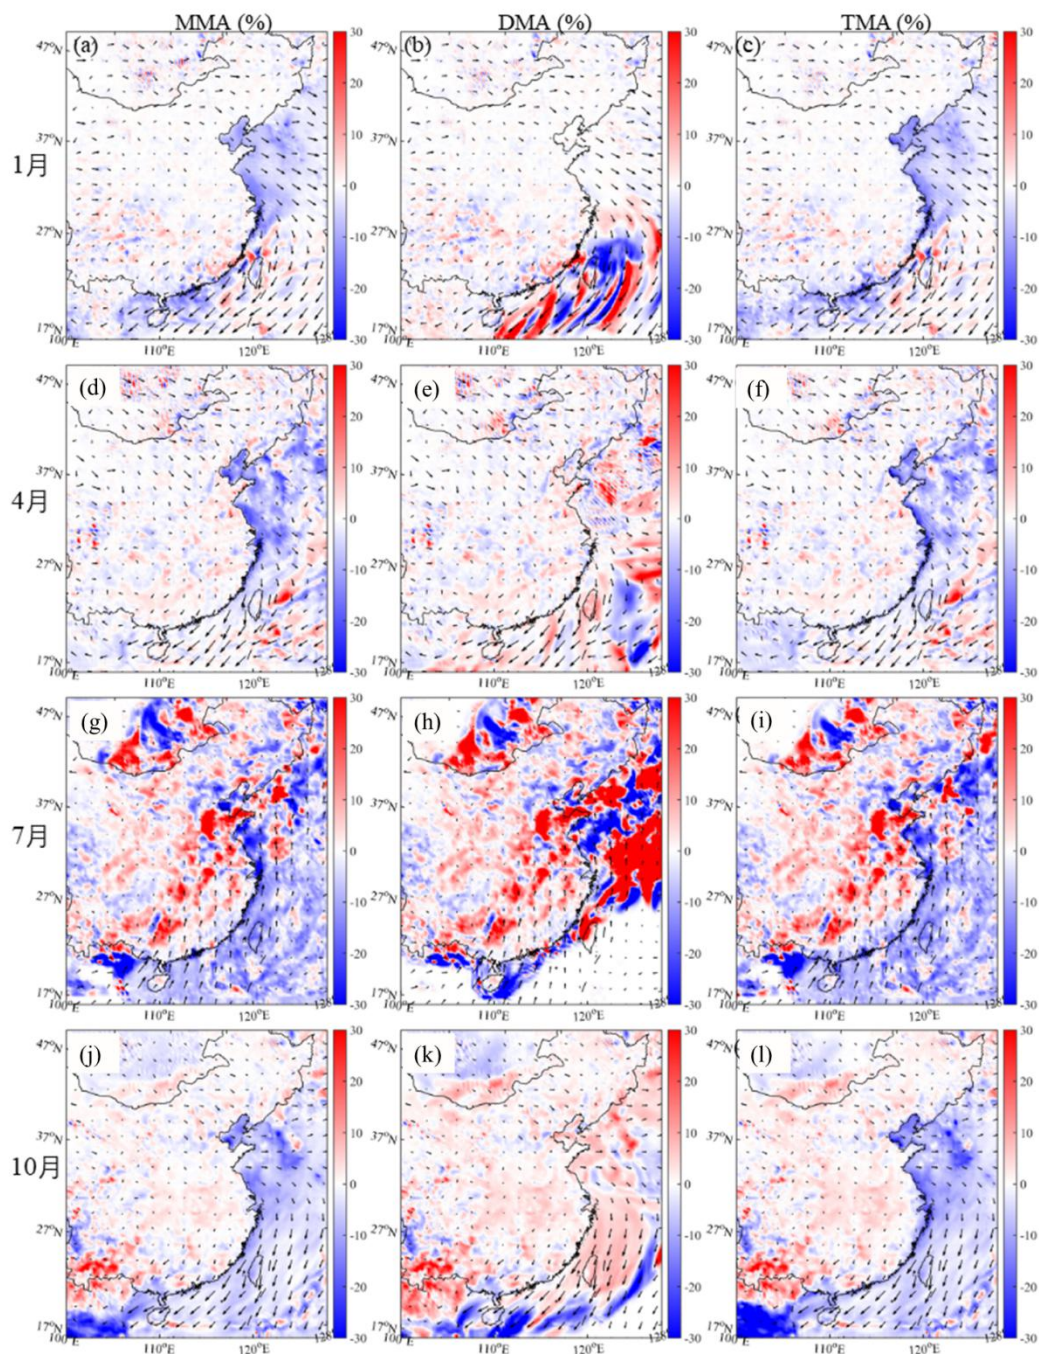

51

52 Figure S3: Changes in amine simulated concentration after reduction of industrial emissions.

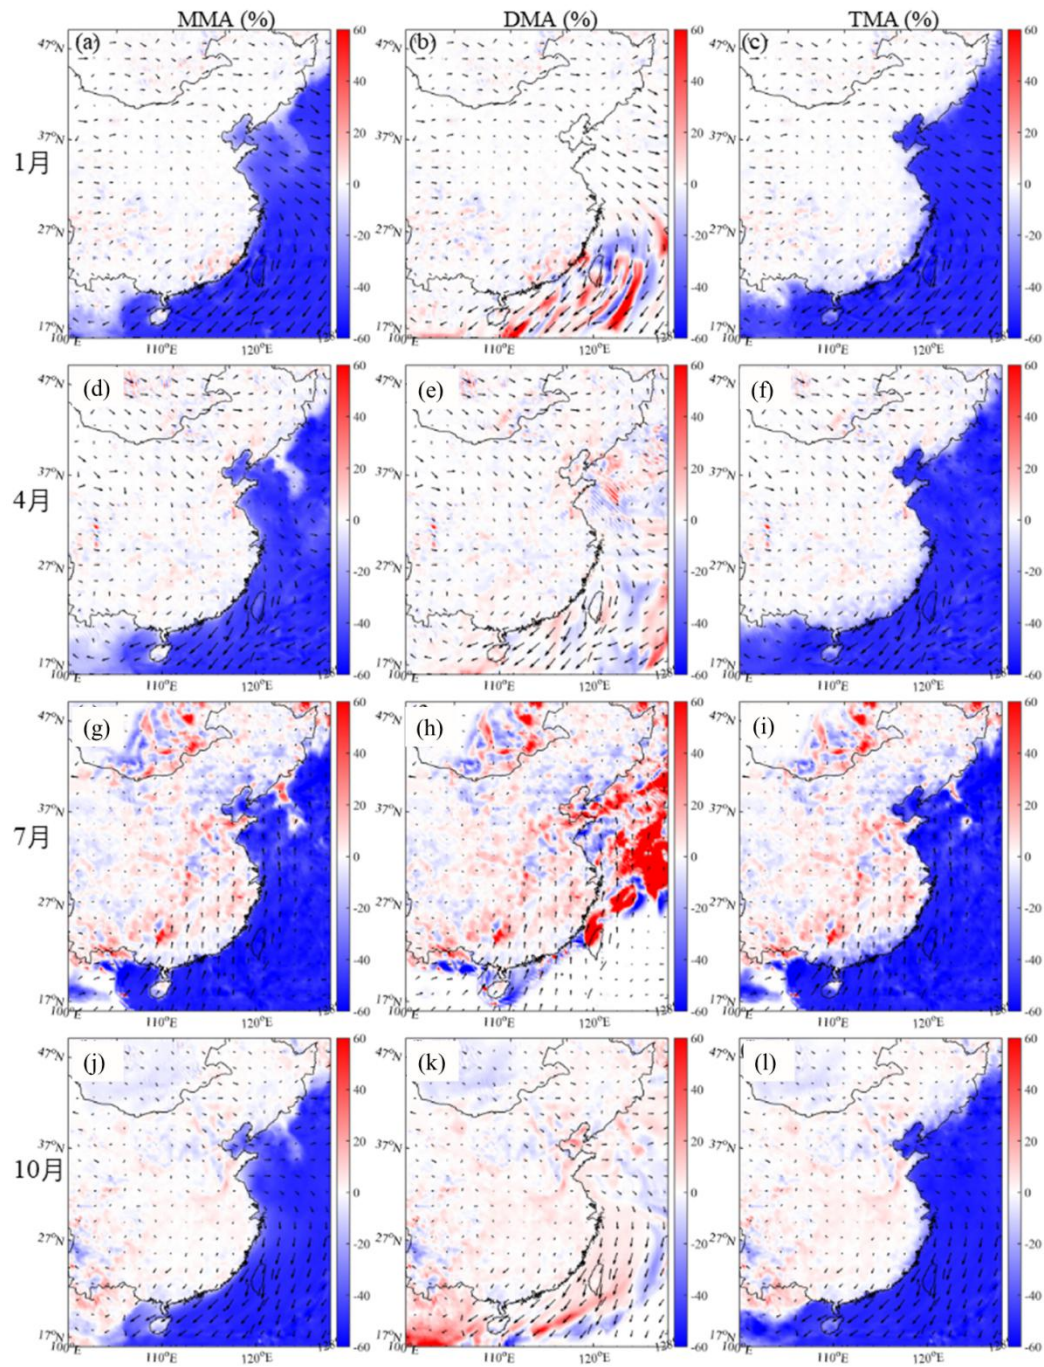

53

54 Figure S4: Changes in amine simulated concentrations after a 50% reduction in Chla.

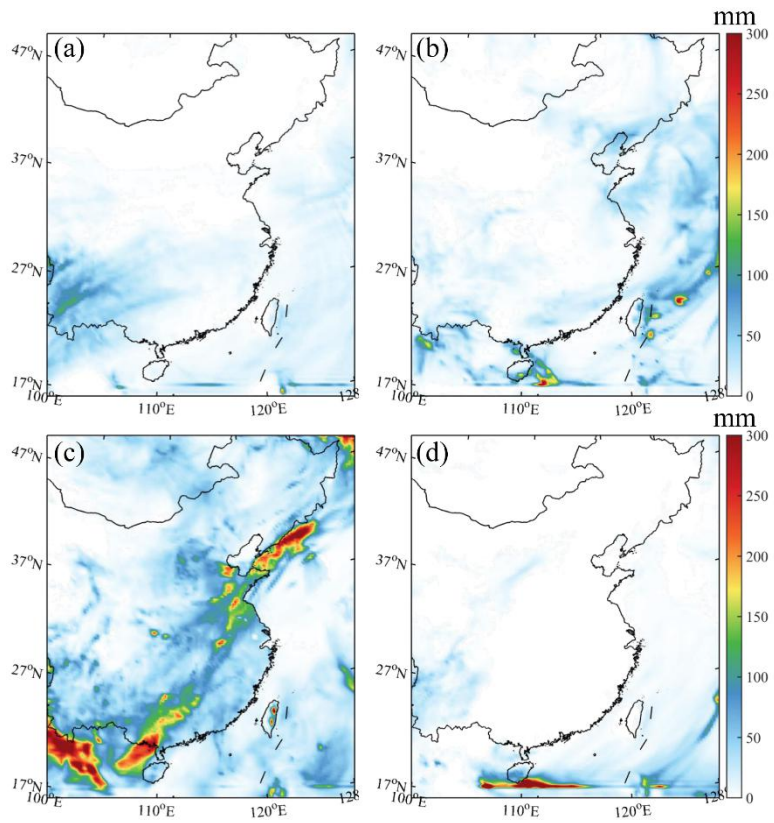

55

56 Figure S5: Changes in amine simulated concentrations after a 50% increase in Chla.

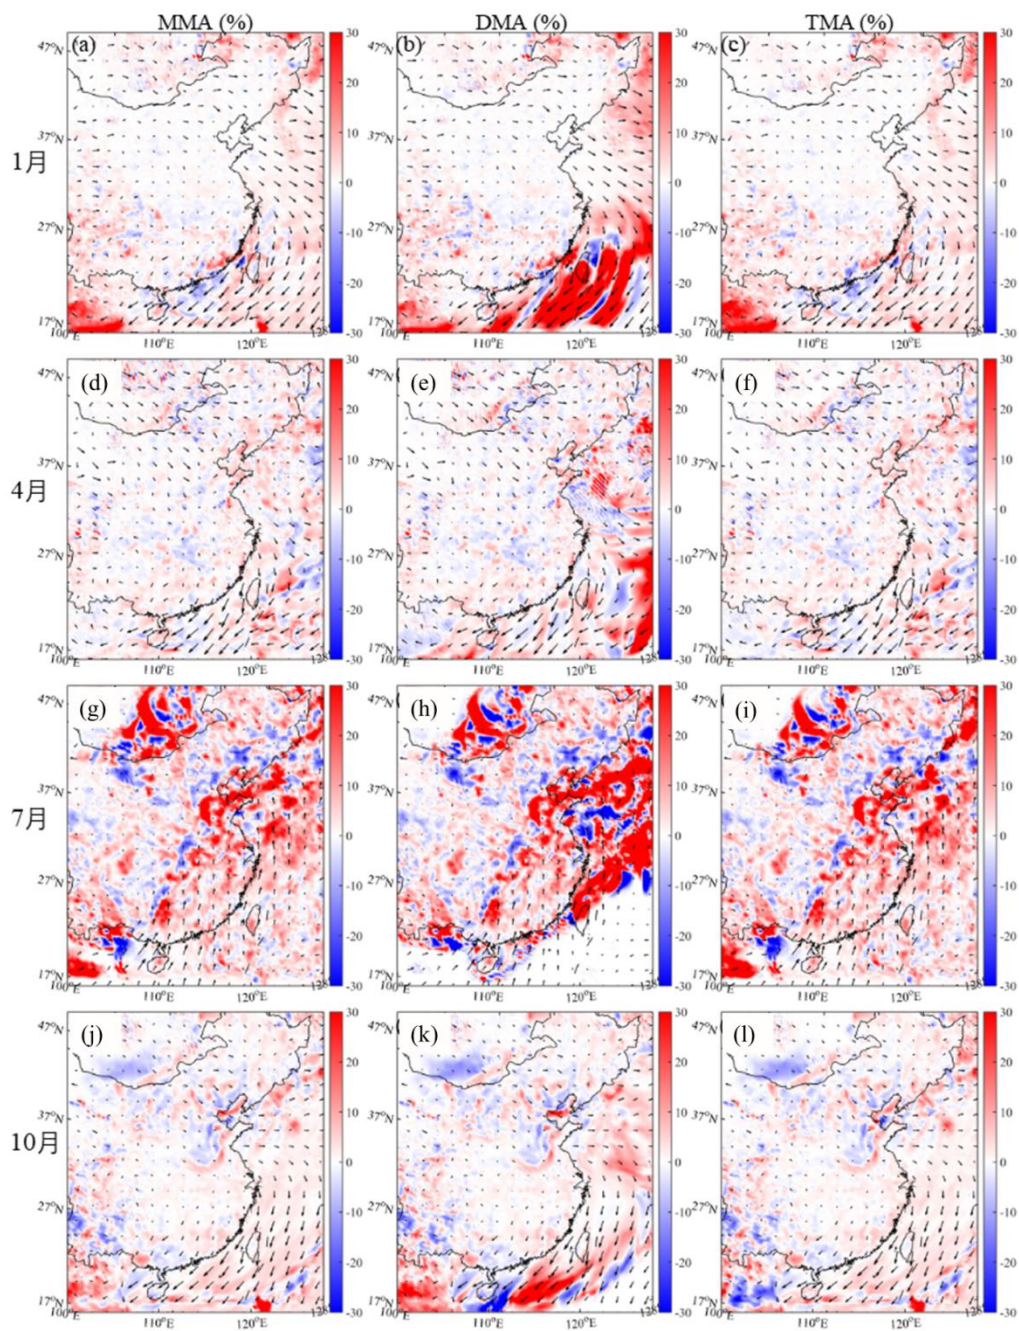

57

58 Figure S6: Changes in amine simulated concentrations after a 50% reduction in WS.

59

60 Figure S7: Simulated accumulated rainfall distribution in the simulated period: (a) January, (b) April,
 61 (c) July and (d) October.

62

63 Figure S8: Changes in amine simulated concentration after decreasing the apparent Henry coefficient.
